# ANNUAL PUBLIC HEALTH REPORT, 1952

## CHAPTER I

### THE HEALTH OF BOMBAY STATE IN 1952

This Chapter provides a rough and ready glimpse into the state of public health in Bombay during the year 1952, the details of which are recorded in the subsequent Chapters.

1. A deficient monsoon led to the prevalence of scarcity conditions in several districts of the State towards the latter part of the year, which necessitated the setting up of special scarcity works and camps and suitable arrangements for curative and preventive medical relief. There was no untoward ill-effect either by way of epidemics or even by way of an undermining of the health of the people in the scarcity-affected areas.

2. The vital events remained more or less unchanged, the small variations being not due to any significant factors. The birth-rate was 33·3 per mille, the death-rate 16·8 per mille, the infant mortality rate 116·3 per 1,000 live births and maternal mortality rate 4·8 per 1,000 live and still births. The fall in the birth-rate which was first noticed in the quinquennium ending 1945 is still being maintained ; but there has been no further appreciable fall since that year.

3. Death rate, on the other hand, which started falling in the quinquennium ending 1950 seem to show a further downward trend, though the death rate for 1952 (16·8) was actually slightly higher than in 1951 (15·9).

4. A detailed analysis of the causes of death can only be made in broad terms in view of the poor quality of the raw data under the existing system of registration of vital statistics through non-medical agencies in villages without even the aid of a legal compulsion for such registration. Fevers and other causes therefore claimed the bulk of the toll. Between them, they account for 80 per cent. of the total mortality, fevers themselves accounting for a mortality of 6·8 per mille in 1952. There is a distinct fall in the fever death-rate during the last two years, part of which may be attributed to the control of malaria.

5. Respiratory diseases also show a progressive fall from the quinquennium ending 1945. Part of this fall should be attributed to the availability and use of sulpha drugs and anti-biotics. The death rate due to respiratory cases in 1952 was 2·6 per mille, against 5·1 in the quinquennium ending 1935. Pulmonary tuberculosis claimed 26,332 registered deaths during the year against 25,533 in the previous year. This disease accounts for 4 per cent. of the total deaths. Urban and rural tuberculosis death rates are nearly equal (0·7 and 0·8 per mille).

6. As many as 1,918 deaths were reported due to whooping cough against 3,403 in the previous year. It seems likely that several deaths due to this disease have escaped registration.

7. There were 21,273 deaths due to diarrhoea and dysentery with a death rate of 0·6 per mille. In urban areas the death rate was 0·7 and in rural areas 0·5.

8. Injuries accounted for 9,772 deaths, of which 984 were due to snake-bites.

9. Rabies accounted for 202 deaths during the year.

10. There were 369 deaths due to diphtheria of which 82 occurred in rural areas and 287 in urban areas. There seems no doubt that the prevalence of this disease in rural areas is unrecorded in several cases.

11. There were 1,691 deaths due to cancer of which 1,224 were recorded in urban areas.

12. 955 deaths were due to leprosy, 75 per cent. of which were in rural areas.

13. Acute poliomyelitis claimed 42 deaths of which as many as 27 were reported from Greater Bombay.

14. Of the three major epidemics, autochthonous plague was totally absent from the State and the only two fatal cases which occurred during the year in Greater Bombay were imported. Natural ups and downs are well-known in plague. But during the last three years, particularly during the last two years, the prevalence of this disease has almost reached a vanishing point. While natural causes have no doubt played their part in bringing about such a condition, it is largely also due to the specific D.D.T. spraying campaign in malarious districts of the State which were also endemic for plague.

15. Cholera accounted for 1,733 deaths as against 1,378 in the previous year. The case mortality was 56 per cent. The districts worst affected were Dharwar, Kolaba, Poona and Satara North. The Gujarat districts were completely free. One phase of the epidemic was definitely due to the Dehu fair held in March in Poona district at which almost on the last day cases of cholera occurred and the infection was disseminated to the rest of Poona district and the districts of Satara and Kolaba. In Dharwar, the epidemic was more or less carried over from the previous year though the incidence was low.

16. Small-pox accounted for 3,731 deaths against 6,102 in the previous year. The disquieting feature of infantile and juvenile small-pox is still persistent which calls, therefore for a more efficient programme of primary vaccination. The case mortality in small-pox was 35 per cent. 70 per cent. of the small-pox deaths occurred in the first four months of the year.

17. The three fifty-bedded Mobile Hospital Units which are a special feature of this Department played an important part in isolation and treatment of a large number of cases of infectious diseases. During the year these units treated 502 cases, of cholera about 500 cases, of poluria and polydipsia and more than 200 cases of pellagra,

18. Malaria control with the use of D.D.T. as an indoor residual spray continued to be in progress during the year in nine districts and parts of three other districts. In these areas the dispensaries show a reduction in the number of malaria cases to the extent of about 2,00,000. As these dispensaries cater only to one-sixth or one-seventh of the total population in the talukas, as all the villages in the talukas are included in the malaria control operations and as the rate of reduction will be the same in the entire area, it is estimated that the total reduction in malaria during 1952 is about 1.2 million cases. Spleen rates have dropped to less than 5 per cent. in most areas. Infant parasite rates indicating the quantum of new infection every year have almost been nil. Altogether 8,200 villages were sprayed and a little over 220 tons of D.D.T. Technical consumed during the year.

19. During the year a new disease characterised by frequent passing of urine and great thirst came to the notice of the Department in certain parts of Ahmednagar and Poona districts. More than 1,000 cases were investigated and more than half of them were treated in one of the Mobile Hospital Units of the Department. No definite conclusion as regards the origin of the disease, the method of spread or the best means of treatment have so far been reached. Amongst various possibilities such as dietary deficiencies, intoxications, infections (bacterial and viral), which have been put forward, the infection theory can alone be somewhat supported. Rest in bed and routine hospital diet improves the health of the patients in about two or three weeks in more than 50 per cent. of the cases. This has made a statistical appraisal of specific modes of treatment extremely difficult. The slightly increased rate of cures with the use of sulpha drugs and the still higher cure reached with chloromycotin are not statistically significant; and as the use of anti-biotics is costly, the results do not warrant their general recommendation.

20. Of the numerous fairs and festivals in the State, the most important are the ones at Pandharpur. All the four fairs at Pandharpur returned a clean bill of health, although in the case of one of them, there was a small outbreak of cholera amongst the followers of one of the Palkhis. The Kartiki fair at Alandi also passed off with a clean bill of health. The Dehu fair in Poona, however, as stated earlier, was responsible for the spread of cholera over a considerable area and for quite a few weeks. There are pipe-water supplies in 68 towns. The question of introduction of pipe-water supplies in other urban areas is engaging the attention though the pace of progress is slower than what one would desire.

21. An integrated curative and preventive service is being rendered through the medium of Combined Medical and Public Health Units of which there are so far 23. Though administratively sanction exists for the creation of such units at the rate of one per taluka, financial stringency has stood in the way of the implementation of such a programme. 378 drinking-water wells were constructed during the year and 201 step-wells were converted into draw-wells. These wells were distributed more or less amongst all the districts of the State.

22. Housing continued to receive attention. There were 927 housing societies as against 857 at the end of the previous year. About 113 lakhs of rupees were sanctioned as loan under these housing schemes. Nearly 7½ lakhs of rupees were sanctioned as loan to 15 Colonies for backward classes for house construction. About 50,000 rupees were sanctioned to two housing societies for similar purpose and about 8,000 rupees to seven individuals. The Bombay Provincial Housing Board formulated and executed several housing schemes specially for industrial workers in Bombay, Ahmedabad, Sholapur and Hubli.

23. Maternity and child welfare work was rendered, as in the past, principally through the agency of the Bombay Mothers' and Children Welfare Society which is given an annual grant-in-aid, the Combined Medical and Public Health Units and maternity homes maintained by local bodies and Government. The Society mentioned above has six welfare units. It runs two health schools where training of Health Visitors, Dais, Midwives, etc., is undertaken. Ninety-two Dais and 18 midwives were trained during the year by the society. 5,663 labour cases were conducted and several auxiliary services rendered in connection with maternity and child welfare. The Combined Medical and Public Health Units conducted 1,029 labour cases at the centres and 633 through domiciliary visits. Ante-natal and post-natal and infant and pre-school child care were also attended to by these units. There are numerous maternity homes maintained by local bodies and private individuals in different parts of the State.

24. School hygiene is mainly provided for by way of instruction in health and hygiene in primary schools and the teaching of physiology, hygiene, domestic science, etc., in the institutions in which school teachers are trained. Medical inspection of school children is in force in certain areas under the agency of the local bodies.

25. Health education is carried out by the touring public health staff as well as through the agency of a special propaganda van maintained by the Department. The Director of Publicity, the Bombay Mothers' and Children Welfare Society and certain other voluntary sanitary associations also carry out intensive health education.

26. The Bombay Provincial Food Adulteration Act was in force in 78 local areas and altogether 39,418 samples of food were analysed in the different laboratories in the Bombay State, amongst which 7,778 were found adulterated. Further punitive action was taken in practically every case of adulteration in accordance with law.

27. A draft Public Health Act was referred to a Committee under the Chairmanship of Dr. M.D.D. Glider and the Committee held several sessions during the year in scrutinising the same and preparing draft modifications.

## CHAPTER II

## METEOROLOGY

*Rainfall and Weather Conditions*

28. During the first week of June, Kolhapur, Bijapur and Kanara experienced good rains ; Amreli, West Khandesh, Nasik, Ahmednagar, Kolaba and Ratnagiri districts had light rainfall and there was no rain in the other districts. In the second week rainfall was widespread in Ratnagiri and Kanara but moderate to light in Gujarat, Karnatak and Deccan districts. In the third week, Konkan districts, Satara, Poona and Ahmedabad had good rains but in the other districts it was moderate to light. In the last week only Ratnagiri and Kolaba had heavy rains.

In July rain was widespread in the coastal districts but only moderate elsewhere.

During the first half of August, there were heavy rains in Kolaba and Gujarat districts but scanty in other districts, except, in Thana and Kolaba where there were good rains in the second week. In the second half, the Konkan districts had adequate rains, there was none in Amreli and Sholapur districts and the other districts had only very scanty rains.

In September, only the Konkan districts had adequate rains and there was little or no rain elsewhere.

In October, there were a few showers in Deccan and Ratnagiri districts. Rainfall was sporadic in November and December. Although there was rain in every month it was far below average during the active months of the monsoon in all but Konkan districts and the ground water table did not therefore get filled to the usual height.

## CHAPTER III

## VITAL STATISTICS (INCLUDING POPULATION, EMIGRATION AND IMMIGRATION).

29. *Population* :—

Mid-year estimate (1951)	...	...	36,192,498
Mid-year estimate (1952)	...	...	36,886,616

(Computed by arithmetic increase method).

30. *Area* :—

Area in square miles	...	...	110,621
Density of population	...	...	333 per sq. mile.

## The ratio of—

Urban Population	to	Rural Population	...	is as	1	:	2
Number of Districts (excluding Greater Bombay).							27

There has been no change in the area during 1952.

31. *Vital Statistics*.—Salient features in 1952 compared with the figures for 1951 are :—

(1) A slight decrease in Birth rate from 34·0 to 33·3.

- (2) A slight increase in death rate from 15·9 to 16·8.  
 (3) A further slight reduction in infant mortality rate from 117·2 to 116·3.  
 (4) A decrease in survival rate from 18·1 to 16·8.  
 (5) No change in maternal mortality rate (4·8).

32. *Births*.—The following table shows the number of registered birth and birth rates during 1952 as well as in preceding years.

Years.		Birth.	Birth rate.
1932-35 mean	...	713,456	38·3
1936-40 mean	...	752,336	38·3
1941-45 mean	...	737,836	34·2
1946-50 mean	...	876,865	32·6
1951	...	1,231,729	34·0
1952	...	1,227,772	33·3

33. *Birth rates in Collectorates*.—The highest birth rate was recorded in East Khandesh District (45·7) and the lowest was in Thana District (20·9). Of the 27 districts of the State, only 2 districts recorded a birth rate of over 40 per mille. Nineteen districts had birth rates ranging between 30 and 40 per mille and 6 between 20 and 30 per mille of estimated mid-year population.

34. *Births in Urban Areas*.—The total number of registered births in urban areas during the year was 358,279 as against 315,464 in 1951, the birth-rates being 31·0 and 32·9 respectively. Among towns, high birth rates were recorded in Bet (54·18), Bulsar (53·6), Pardi (52·0) and Dholka (49·8). Low birth rates were recorded in the towns of Baindur (4·3), Kandivali (4·4) and Naroda (4·7).

35. *Births in Rural Areas*.—The total number of births recorded in the rural areas was 869,493 giving a birth rate of 34·4 per mille. High birth rates were recorded in the Districts of East Khandesh (50·7), Dharwar (43·5) and West Khandesh (43·4). Low birth rates were recorded in the Districts of Sabarkantha (23·6), Thana (24·8), Banaskantha (26·1), Ratnagiri (27·1), Baroda (27·4) and Panch Mahals (27·5).

36. *Births in Greater Bombay*.—The number of births recorded in Greater Bombay was 83,091 and the birth rate 27·8 as against 80,086 and 27·9 respectively in 1951.

37. *Births in Cantonments*.—Among the six Cantonments, the highest birth rate was recorded in Ahmednagar Cantonment (34·1) and the lowest in Deolali Cantonment (2·0).

38. *Sex ratio in Births*.—Of the total births, 637,508 were males and 590,264 females. For every 100 female births, there were 108 male births.

39. *Still births.*—There were 11,731 still births registered during the year i.e. 0·95 for every 100 live births as against 12,145 and 1·00 in 1951. The percentage recorded in Greater Bombay was 4·4. Distribution by classes and sex and Districts is shown in Annual Form No. 1 (a) in Appendix V.

40. *Verification of Vital Statistics.*—The public health staff during their routine tours checked the village birth and death registers and omissions detected were entered in the respective birth and death registers. A detailed statement showing the number of unregistered births and deaths discovered in the Bombay State during the year 1952 in both urban and rural areas is given below :—

*Statement showing the Number of Unregistered Births and Deaths that were discovered in the Bombay State during the year 1952.*

41. *Deaths*.—The following table shows the number of registered deaths and death rates during 1952 as well as in preceding years.

Year		Deaths	Death rate per mille of estimated population
1932-35 mean	..	486,484	25·1
1936-40 mean	..	506,845	25·8
1941-45 mean	..	540,034	25·1
1946-50 mean	..	587,820	21·4
1951.	..	576,643	15·9
1952	..	618,681	16·8

42. *Death rates in Collectorates*.—The highest death-rate was recorded in the District of Ahmedabad (20·9) and the lowest in Thana District (9·1). Only 3 districts had death-rates above 20 per mille of estimated population, 18 districts had between 15 and 20 per mille, 5 between 10 and 15 per mille and 1 below 10 per mille of population.

43. *Deaths in Rural Areas*.—The number of deaths recorded in rural areas was 441,970 with a rate of 17·5 per mille of population. High death-rates were recorded in the Districts of East Khandesh (21·1), Broach (21·1), Bijapur (20·7), Dharwar (20·7), Satara North (20·5), Balgaum (20·2) and Kaira (20·1) and low death rates in Sabarkantha (9·3) and Thana (11·3).

44. *Deaths in Urban Areas*.—The total death rate for urban areas was 15·3. High death rates were recorded in Attarsumba (32·7), Mehmedabad (30·7) and Mahuda (30·7). Low death-rates were recorded in the towns of Baindur (1·6), Agashi, (2·5), Rajuri (2·6), Eksar (2·9) and Naroda (3·0).

45. *Death-rates in Cantonments*.—The highest death-rate was recorded in Ahmedabad Cantonment (12·9) and the lowest in Deolali (2·7).

46. *Excess of births over deaths*.—Births exceeded deaths by 609,091 against 655,086 in 1951. The percentage increase in population was 1·65.

47. *Deaths according to sex*.—Deaths among males numbered 319,481 and among females 299,200. The ratio of deaths of males to every 100 deaths of females was 106·8, the same as in 1951. Deaths by castes or classes and by sex are recorded in Annual Form No. V, Appendix V.

48. *Deaths according to causes compared with previous years*.—The following table shows the number of deaths in 1952 and the ratio per 1,000 of the mid-year population arranged according to causes and compared with similar figures for 1951 and the average for the preceding five year.

CHART II  
 CHART SHOWING INFANT MORTALITY RATE  
 IN THE BOMBAY PROVINCE FROM 1915 TO 1952.

Causes	1951		1952		Mean of the previous five Years	
	No.	Ratio per mile of population	No.	Ratio per mile of population	No.	Ratio per mile of population
Cholera ...	1,378	0·03	1,733	0·04	4,468	0·17
Small-pox ...	6,102	0·17	3,731	0·10	5,461	0·17

All causes ...	5,76,643	15·9	6,18,681	16·8	5,79,769	20·0

Graphs showing the incidence of deaths under the chief causes for the year under report compared with previous years are shown in Charts I to IV. Graphs showing the annual incidence of deaths from epidemic diseases cholera, small-pox and plague are shown in Chart No. VI.

49. *Infant Mortality*.—There is a slight further decline in infant mortality, the rate during the year being 116·3 as against 117·2 in 1951.

The number of deaths under 1 year of age was 142,843 in 1952 and 142,633 in 1951. Male infant deaths exceeded female infant deaths by 10,629. Of the total number of infant deaths, 50,625 or 35 per cent. were under one month of age, 50,207 or 35 per cent. were over one month old and under six months and 42,011 or 30 per cent. were over 6 months old and under 12 months. During 1951, the percentage in the above age groups was 37, 35 and 28.

50. *Infant Mortality Rate in Urban and Rural areas*.—The urban and rural infant mortality rates per 1,000 registered births were 122·1 and 114·0 as compared with 124·6 and 112·8 respectively in 1951. Among towns high infant mortality rates were recorded in Adar (383·8), Vadod (348·6), Chikodra (285·7), Biriavi (285·0), Vadner Bhairao (280·6), Attarsumba (273·6) and Umreth (256·6). Among rural areas, the districts of Nasik (156·4), East Khandesh (154·0), Kaira (147·2), Ahmedabad (145·0) and Poona (142·0) recorded high infant mortality rates. Infant mortality in 1952 as compared with previous years is given in the table below :—

Year	Deaths under 12 months			Births registered			Infant death-rate per 1,000 births			Infant deaths per 100 of total deaths.
	Male	Female	Total	Male	Female	Total	Male	Female	Total	
1916-20 mean	64,131	55,719	119,850	291,606	274,110	565,716	219.93	203.27	211.9	15.9

## CHAPTER IV

## HISTORY OF CHIEF DISEASES

51. *General remarks on the health of the State.*—During the year under report there was neither any great hazard to the state of public health nor was there any outstanding improvement.

52. *Fevers.*—Fevers and other causes account for as much as 80 per cent. of the total mortality. Though they are found to maintain mostly equal proportions over a period of years, it is no evidence of the correctness of classification as fevers. The bias of the village officers taken as a whole may only be deemed to be evenly distributed between fevers and other causes in ascribing a death due to any but easily determinable causes. Fevers, including different undetermined causes of death, accounted for 2,48,989 or 40 per cent. of total mortality during the year. This group includes a variety of heterogeneous diseases and a large number of unclassified conditions. The death rate due to fevers during the year was 6·8 against 6·3 in 1951. The urban death rate was 3·6 and the rural 8·2. The mean death rate of the previous five years due to this cause was 7·7.

53. *Fever mortality in previous years.*—The mortality recorded under this heading is given below :—

Year.		Fever deaths.	Rate per mile.
1932-35 mean	..	164,501	8·9
1936-40 „	..	170,658	8·7
1941-45 „	..	193,068	8·9
1946-50 „	..	217,953	8·1
1951	..	227,131	6·3
1952	..	248,989	6·8

Distribution of fever deaths is shown in Annual Form No. IX.

54. *Death rates from fevers in Collectorates.*—High death rates from fevers were recorded in the districts of Mehsana (15·8), Broach (12·8), Banaskantha (11·6) and Panchmahals (11·2).

55. *Death rates from fevers in urban and rural areas.*—High death rates from fevers were recorded in the towns of Kamdoli (20·9), Umta (19·6), Unzha (19·5) and Unava (18·9). In the rural areas, high death rates due to fevers were recorded in the districts of Mehsana (16·2), Broach (13·8), Amreli (12·6), Baroda and Panchmahals (12·1) each and Ahmedabad (12·0).

Of the total fever deaths (2,48,989), malaria accounted for 24,335 deaths, measles 7,132, Enteric fever 3,871, Cerebro Spinal Fever 41, Influenza 13, Kala Azar 3 and Typhus 1. The remaining 213,593 deaths were recorded under the omnibus heading “Other Fevers”.

Details of deaths from fevers are shown below :—

*Malaria.*—*Vide Chapter VI.*

56. *Enteric Fever.*—Deaths due to this cause in 1952 numbered 3,871 against 3,853 in 1951, the rate per mille of population being 0·10 and 0·11 respectively.

57. *Deaths from Enteric fever in Urban and Rural areas.*—The disease was more prevalent in the towns of Ahmedabad (78), Sholapur (58), Hubli (39), Baroda (38) and Poona (29). Greater Bombay had 481 deaths due to this cause as compared with 310 in 1951. In rural areas, more deaths due to enteric fever were recorded in the districts of Dharwar (324), East Khandesh (202), Belgaum (199) and Surat (151). Contacts of cases were given TAB inoculations, water supplies were disinfected, fly control measures were adopted and health education was imparted regarding personal cleanliness.

The Haffkine Institute, Bombay, continued to give diagnostic aid by examining clinical material sent by private medical practitioners free of charge in case of Enteric Fever, Diphtheria, Cholera, Dysentery, Plague, Cerebro Spinal Fever and Malaria. In Greater Bombay and its suburbs arrangements were also made to send a Medical Officer from the Haffkine Institute to collect material from suspected cases of enteric fever at the request of the medical practitioners for establishing diagnosis.

58. *Measles.*—Deaths due to measles numbered 7,132 in 1952 against 6,287 in 1951, the respective rates being 0·19 and 0·17 per mille.

59. *Deaths from measles in Urban and Rural areas.*—The disease was more prevalent in the towns of Surat (312), Ahmedabad (265), Nadiad (179) and Sholapur (176). In the rural areas, the incidence was high in the districts of Belgaum (477), Mehsana (471), Ahmedabad (386), Dharwar (351) and Satara North (321). Greater Bombay had 71 deaths due to this cause against 127 in 1951.

# CHART IV

CHART SHOWING MORTALITY RATE FROM FEVERS  
& MALARIA BY YEARS FROM 1919 TO 1952.

FEVERS  
MALARIA

60. *Kala Azar*.—There were 3 deaths from Kala Azar during the year 1952 against 5 in 1951, all of which occurred in Greater Bombay.

61. *Typhus*.—Only one death was recorded due to this cause during the year and the same was from Greater Bombay.

62. *Cerebro Spinal Fever*.—41 deaths due to this cause were reported in the State against 25 in 1951. Greater Bombay had 10 deaths due to this cause.

No deaths were recorded due to relapsing fever, black-water fever, beri-beri and mumps during the year.

63. *Respiratory Diseases*.—The following table shows the number of registered deaths and death rates due to respiratory diseases during 1952 as well as in the preceding years :—

Year.			Deaths.	Ratio per mille of population.
1932-35 mean	...	...	95,829	5·1
1936-40 mean	...	...	112,227.	5·7
1941-45 mean	...	...	104,554	4·8
1946-50 mean	...	...	98,029	3·8
1951	...	...	88,431	2·4
1952	...	...	95,891	2·6

Of the total deaths due to this cause, 18 per cent. were due to Pneumonia, 27 per cent. due to phthisis, 2 per cent. due to whooping cough and the remaining 53 per cent. were recorded under the head "Other Respiratory Diseases" for want of details. The death rate for urban areas was 3·5 and rural areas 2·2. Greater Bombay reported 11,564 deaths due to this cause against 12,837 in 1951 and the death rate was 3·9 and 4·5 respectively.

64. *Death rates from Respiratory Diseases by Districts*.—High death rates were recorded in the districts of Ahmedabad (4·9), East Khandesh, West Khandesh and Dharwar (3·1) each, Sholapur and Bijapur (3·0) each. Low death rates were reported from Baroda (0·8), Amreli and Sabarkantha (0·9) each.

65. *Death rates from Respiratory Diseases in Urban and Rural areas.*—High death rates from respiratory diseases were recorded in the towns of Kapashi (10·0), Ahmedabad (8·7), Naregal (8·4), Viramgam (8·2), Kamatgi (8·0) and Boregaon (7·9). In rural areas, high death rates were recorded in the districts of East Khandesh (3·3), West Khandesh, Dharwar and Ratnagiri (3·1) each.

66. *Seasonal Mortality of Respiratory Diseases.*—From the Annual Form No. XI in Appendix V it will be seen that the variations in recorded deaths from respiratory diseases in different months were only slight; the months of March and November had, however, more deaths than the other months while June and July had the lowest number.

67. *Phthisis.*—There were 26,332 deaths due to phthisis recorded during the year 1952 against 25,533 in the previous year. This disease has accounted for 4 per cent. of the total deaths. Government has provided facilities free of cost for diagnosis and treatment of cases of phthisis at the Civil Hospitals at Ahmednagar, Surat, Poona, Nasik, Sholapur and Belgaum. Bombay, Poona and Ahmedabad Corporations have their own clinics. There are also private sanatoria including charitable ones at places like Malavli, Talegaon, Miraj, Hukeri, Panchgani, Deolali, Khandala and Vengurla. A Government hospital for the diseases of chest is also functioning at Aundh in Poona District.

68. *Deaths from phthisis in urban and rural areas.*—The urban death rate during the year due to this cause was 0·8 and the rural 0·7. Among towns, high death rates were recorded in the towns of Bhalod (3·3), Matheran (3·2), Naroda and Kognoti (2·8) each, Kayal and Mahad (2·5) each. High death rates from rural areas were reported from the districts of Ratnagiri and Kolaba (1·6) each and Satara North (1·2).

69. *Pneumonia.*—There were 16,896 deaths due to pneumonia during 1952 against 15,870 in 1951. The death rate was 0·45 per mille of the mid-year estimated population as compared with 0·43 in 1951.

70. *Deaths from Pneumonia in urban and rural areas.*—The urban death rate from pneumonia was 1·2 and the rural 0·1. High death rates due to this cause were recorded in the towns of Sholapur (4·4), Kaladgi (3·4) and Katkol (3·0). The death rate recorded in Greater Bombay due to this cause during the year was 2·7 against 2·9 in 1951.

71. *Whooping cough.*—There were 1,918 deaths due to this cause against 3,403 in 1951, the mortality rate being 0·05 and 0·09 respectively. The urban death rate was 0·04 and the rural 0·06.

72. *Dysentery and Diarrhoea.*—Under this heading there were 21,273 deaths as compared with 19,106 in 1951, the death rates being 0·6 and 0·5 respectively. The number of deaths in urban areas was 7,821 and in

rural areas 13,452, the death rates being 0·7 and 0·5 respectively. Greater Bombay recorded 1,704 deaths due to this cause and the death rate was 0·6.

73. *Dysentery*.—Under this heading there were 2,905 deaths against 3,045 in 1951. The number of deaths in rural areas was 1,444 and in urban areas 1,461. Greater Bombay recorded 333 deaths during the year.

74. *Diarrhoea*.—There were 18,368 deaths during the year 1952 against 16,061 in 1951. The urban area had 6,360 deaths and the rural areas 12,008.

In Appendix I, a table is given showing the effects on the death rates of the introduction of the piped water supply.

75. *Injuries*.—The total number of deaths recorded under the heading “Injuries” during the year 1952 was 9,772 against 9,737 in 1951.

76. *Deaths from Snake-bites*.—Of the 9,772 deaths due to injuries, 984 were due to snake-bites as compared with 1,326 in 1951.

77. *Deaths from Rabies*.—202 deaths due to rabies were reported in the State against 189 in 1951.

78. *Suicidal deaths*.—Under this heading 655 deaths (363 males and 292 females) were recorded against 675 in 1951.

79. *Deaths from other causes*.—The following table shows the number of registered deaths and death rates due to other causes during 1952 as well as in the previous years :—

Year.		No. of Deaths.	Ratio per mille.
1932-35 mean	...	166,147	8·9
1936-40 mean	...	175,572	8·9
1941-45 mean	...	190,113	8·6
1946-50 mean	...	211,971	8·0
1951	...	224,751	6·2
1952	...	237,290	6·4

80. *Deaths from child birth.*—The number of deaths from child births recorded during the year 1952 was 6,057 against an equal number during 1951. The maternal mortality rate per 1,000 registered births including still births was 4·9 for both the years. Of the total deaths from child birth, 4,738 occurred in the rural areas and 1,319 in urban areas. Greater Bombay reported 99 deaths due to this cause during the current year against 105 in 1951.

81. *Diphtheria.*—Deaths due to diphtheria numbered 369 against 271 in 1951. Of these, 82 occurred in rural areas and 287 in urban areas. Greater Bombay reported 116 deaths due to this cause during the year.

82. *Chicken-pox.*—As many as 42 deaths were reported due to this cause in the State during the year under report against 123 in 1951. These should be largely due to an error in diagnosis, some small-pox cases being reckoned as chicken-pox.

83. *Cancer.*—1,691 deaths were reported due to cancer in the State during the year under report against 1,499 in 1951. The deaths in urban areas were 1,224 and in the rural areas 467. Greater Bombay had 595 deaths due to this cause against 532 in 1951.

84. *Leprosy.*—955 deaths due to leprosy were recorded during the year against 1,156 in 1951. Of these, 755 were in the rural areas and 200 in the urban areas. Among rural areas, the districts of Satara North (137 deaths) and Sholapur (121) and among towns Greater Bombay (66 deaths) had high number of deaths.

85. *Acute poliomyelitis.*—42 deaths due to this cause were reported in the State against 23 in 1951. Of these, 27 were from Greater Bombay.

The number of deaths from the chief causes for each district and by months is shown in Annual Forms VII to XII in Appendix V to this report.

86. *A new disease.*—A new disease with the main symptoms of frequent urination and great thirst appeared in parts of Ahmednagar and Poona Districts in this State since October 1951. These cases came first to the notice of this Department in February 1952. There were in all about 960 cases due to the above disease and 28 among them have died. These deaths cannot however be directly attributed to the disease. As regards the nature of the disease, infection, intoxication, nutritional disorders or deficiency were considered as possibilities. Field investigations were carried out and a Mobile Hospital with accommodation for 50 beds was established and investigations into the nature of the disease and on efficacy of different modes of treatment were carried out. Treatment with anti-biotics appear to yield good results but the higher efficacy is not statistically significant. Rest in bed and hospital

CHART No.V

WEEKLY INCIDENCE OF DEATHS

FROM EPIDEMIC DISEASES

DURING THE YEAR 1952.

diet by themselves gave satisfactory results in 4 weeks in 50 per cent. of the cases. More than 350 cases were treated in the Hospital and the rest in their homes by Public Health Staff with multi vitamin tablets, sulpha drugs etc. Further investigations are in progress.

The only conclusions so far established are that the disease has occurred for the first time in a fairly restricted area since October 1951 and that therefore it is a place of disease. Fatality is rare and rest in bed and normal hospital diet restores the health in a larger number of cases.

The results of investigations which are still in progress will be included in the report for the next year.

## CHAPTER V

### EPIDEMIOLOGY

87. *Cholera*.—The disease prevailed in a moderate form claiming 1,733 deaths as against 1,378 in 1951, the quinquennial average being 4,468. The death-rate for the year was 0·04 against 0·03 in 1951 and 0·2, the quinquennial mean. The total number of cases reported was 3,069 giving a case mortality of 56 per cent. as against 44 per cent. in 1951.

The following table gives the number of deaths recorded in previous years since 1911 and the year under report :—

Year.	No. of deaths.	Year.	No. of deaths.
1911 .. ..	5,808	1923 .. ..	9,212
1912 .. ..	57,789	1924 .. ..	7,827
1913 .. ..	5,108	1925 .. ..	56
1914 .. ..	17,778	1926 .. ..	72

*Distribution.—Vide Annual Form No. VII.*

88. *Deaths from cholera by Districts.*—Relatively large number of deaths was recorded in the Districts of Dharwar (384), Kolaba (348), Poona (298) and Satara North (219). All the districts in the Gujarat and Dangs were completely free from the disease. The infection in other districts was mild.

89. *Deaths from Cholera in Urban and Rural areas.*—There were 214 deaths in Urban areas and 1,519 in the rural areas. Among towns high number of deaths were recorded in Talgaon Dabhade (23), Hubli (19), Poona City (17) and Haveri (14). As far as rural areas are concerned the districts of Kolaba (336 deaths), Dharwar (323), Poona (230) and Satara North (208) had higher incidence.

90. *Brief history of cholera epidemic.*—The disease was prevalent more or less throughout the year. The incidence during February (21 deaths) was the lowest. There was a sharp increase in the incidence during March with 388 deaths, the highest for any months in the year. The next highest incidence was in July (351 deaths). 703 villages from 162 rural circles reported cholera incidence during the year.

In Dharwar District, the disease prevailed throughout the year except in the months of November and December. The infection of the previous year was carried over and it prevailed in a moderate form up to May and during the following two months viz., June and July, the infection was severe recording 196 deaths i.e., more than 50 per cent. of the total cholera deaths in the district during the year. 131 villages out of

total 1,627 reported cholera infection. The worst affected talukas were Haveri, Ranabennur and Byadgi. Most of the villages affected were situated on the banks of the 3 rivers, Tungabhadra, Varda and Kumadvati which were only source of drinking water to the affected villages.

In January and February, Kolaba District was completely free from the disease. The following 2 months recorded mild incidence. During May and June again the district was completely free from the disease. The epidemic again started in July and continued to prevail throughout the rest of the year. The infection was severe during the months of July, August and December claiming 231 deaths out of 348 reported in the district during the whole year. 115 villages in 12 talukas (out of 1,963 in 20) reported cholera infection. The infection was first imported in Masad village in Pen taluka, from Dehu in Poona district and thereafter it spread to other areas in the district.

In Poona District cholera broke out at the time of the Falguni fair at Dehu on 14th March 1952 among the returning pilgrims and spread throughout the district. In all 153 villages and towns reported cholera infection. The month of March recorded the highest number of deaths viz., 175 out of the total deaths of 298 throughout the year. The months of January, September and October were completely free and during the remaining months the infection was mild. Almost all talukas were involved.

In Satara North District the disease started in March and continued to prevail throughout the year. The infection was imported in this district through the returning pilgrims from the Dehu fair in Poona District. The infection thereafter spread to the river side villages. Out of 93 villages infected in the district, 40 were on the river sides. The worst affected talukas of the district were Karad and Satara. Heavy incidence was reported in the months of March, April and October when 152 deaths i.e. more than 60 per cent. of the total deaths were recorded during the period.

91. *Preventive measures.*—Preventive measures adopted in the affected and threatened areas included mass inoculation of the population, repeated disinfection of water supplies, disinfection of infected premises, segregation and treatment of cholera cases etc. The Mobile Hygiene Units and anti-epidemic trucks were fully utilised for speeding up anti-cholera measures. Temporary cholera regulations under the Epidemic Diseases Act were applied to all the affected districts to facilitate speedy control measures. The three Mobile Hospital Units played an important part in the control of cholera by segregating and treating cases in severely affected areas. The Units served in the districts of Dharwar, Sholapur, Poona, Kolaba and Thana. In all about 502 cases were treated in these hospital units of which 442 were discharged, cured and 60 died.

92. *Inoculation.*—The total number of anti-cholera inoculations performed during the year was 17,59,147 against 8,86,042 in 1951,

93. *Small-pox (General prevalence).*—There was a marked decline in the incidence of small-pox in the State since 1950. There were 3,731 deaths in 1952 as compared with 6,102 in 1951. All the districts of the State were more or less affected by small-pox. The death rate was 0·10 against 0·17 in 1951. The quinquennial mean of small-pox deaths was 5,461 with a rate of 0·17. The annual mortality for the previous years and the year under report is given in the table below :—

Year	Deaths.	Year	Deaths.
1901 .. ..	5,340	1927 .. ..	5,091
1902 .. ..	2,189	1928 .. ..	5,265

1921 .. ..	1,771	1947 .. ..	2,161
1922 .. ..	1,170	1948 .. ..	3,239
1923 .. ..	2,811	1949 .. ..	6,768
1924 .. ..	11,152	1950 .. ..	9,034
1925 .. ..	5,644	1951 .. ..	6,102
1926 .. ..	3,922	1952 .. ..	3,731

The number of cases of small-pox recorded during the year was 10,477 and the case mortality worked out to 35 per cent.

Of the 3,731 deaths due to small-pox, 1,167 were among infants under one year of age and 1,718 among children between one and ten years i.e. about 77 per cent. of the total small-pox deaths were among children below ten years of age.

94. *Deaths from Small-pox by districts.*—High incidence was recorded in Ahmedabad (586 deaths), Surat (404) and Thana (385). In the districts of Banaskantha, Kaira, Mehsana, Sabarkantha, Nasik, West Khandesh, Kanara the infection was moderate and in the remaining districts it was mild.

## CHART VI

### ANNUAL INCIDENCE OF DEATHS FROM EPIDEMIC DISEASES

Scale figures represent actual deaths for plague and cholera.  
Figures are at their log: intervals and only those above 1000 are shown.

95. *Deaths from Small-pox in Urban and Rural Areas.*—In urban areas, there were 1,271 deaths due to small-pox and in the rural areas 2,460. Among towns, high incidence was recorded in Surat (243 deaths) and Ahmedabad (234). Greater Bombay reported 132 deaths. As far as rural areas are concerned, the districts of Thana (309), Mehsana (258) and Ahmedabad (228) had higher number of deaths.

96. *Brief History of Small-pox Epidemic.*—The infection was prevalent in the State throughout the year. The small-pox incidence which was steadily increasing during the last quarter of 1951 assumed epidemic proportions during the first four months of the year under report. Thereafter it gradually declined till October and there was a slight increase in the incidence during November and December. Out of the total 3,731 deaths recorded due to small-pox during the year, 2,584 were recorded during the first four months of the year. In Surat District the disease was reported in almost all the talukas. The total population in the affected towns and villages was about 416,096. Six towns and 158 villages were involved more than 50 per cent. deaths reported in the District were from Surat Town. The District was free from small-pox during July and August, the highest incidence (128 deaths) being recorded in February. In Ahmedabad District all the talukas were involved. Six towns including Ahmedabad City and 55 villages reported small-pox incidence. The population of the affected towns and villages was about 922,279. The disease was prevalent in the district throughout the year except in the months of September and October when the district was completely free. The infection was severe during February, March and April and the highest incidence being recorded in April (188 deaths). In Thana District, the disease was prevalent during the whole of the year, except December. The population of the affected localities was 299,092 in 181 villages and 4 towns. The disease was in an epidemic form during the months of March and April when 226 deaths i.e., more than 59 per cent. of the total deaths reported during the year were recorded.

In the infected and threatened areas, vaccination and re-vaccination campaign was carried out on a mass scale. To facilitate this work Temporary Small-pox Act Regulations under the Epidemic Diseases Act were applied to all the severely affected districts. Extra Vaccinators were also appointed wherever necessary to assist the vaccination staff to push on mass vaccination. Propaganda in favour of vaccination was carried out by the Public Health Staff. During the year 1,261,649 primary and 2,233,897 re-vaccinations were performed.

97. *Vaccinal condition.*—The table given below shows the vaccinal condition of small-pox cases treated in the Infectious Diseases Hospitals :—

Age.	Total No. of cases admit- ted.	Vaccinated as evidenced by the presence of one or more vaccination cicatrices.															Total among vaccinated.				Stated to have been success- fully vaccinated but no vaccination cicatrix present.	Stated to be unvaccinated (or vaccinated unsuccessfully and no vaccination cicatrix present.)	Previously unvaccinated but vaccinated during incubation of small-pox.	Stated to have been success- fully re vaccinated.																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																
		Number attacked after following year after vaccination.																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																						
		1	2	3	4	5	6	7	8	9	10	11	12	13	14	15 and above.	Year not known.																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																							

98. *Plague*.—The entire State was completely free from plague during the whole year except for two deaths reported in Greater Bombay. These cases were imported from outside the State.

The deaths due to plague recorded in the State in each year since 1911 are given below :—

Year.	No. of deaths.	Year.	No. of deaths.
1911	37,248	1932	14,446
1912	27,863	1933	24,560
1913	24,840	1934	13,307
1914	18,529	1935	2,453
1915	40,689	1936	578
1916	79,349	1937	506
1917	1,59,858	1938	406
1918	73,893	1939	1,472
1919	9,041	1940	5,573
1920	12,471	1941	5,311
1921	4,617	1942	680
1922	7,692	1943	715
1923	33,251	1944	2,514
1924	9,092	1945	11,779
1925	12,551	1946	3,405
1926	9,839	1947	3,081
1927	4,075	1948	1,305
1928	13,563	1949	1,139
1929	18,014	1950	146
1930	5,026	1951	7
1931	3,506	1952	2

99. *Ratting operations*.—The ratting operations carried out in municipal towns in the State excluding Greater Bombay resulted in 4,026,734 rats being caught and destroyed. Of these 4,460 were examined and none of them was found infected. In Greater Bombay, the ratting operations were continued as usual throughout the year and 1,119,458 were caught and destroyed. 5,802 rats were examined, three of which were found infected.

100. *Anti-plague measures*.—Anti-plague measures consisted of anti-plague inoculations, disinfestation of houses where rat falls were reported, with D. D. T. Sovacide emulsion or insufflation of rat burrows with 10 per cent. D. D. T. powder. The total number of anti-plague inoculations performed in the State during the year was 50,661 against 74,874 in 1951.

The following table shows the number of inoculations performed during the last few years :—

Year.		No. of attacks of plague.	No. of deaths plague.	No. of inocula- tions.	No. of doses of plague vaccine issued within the State.
1928	..	19,583	13,563	1,32,340	2,55,789
1929	..	27,850	18,014	2,95,544	3,47,920
1930	..	7,796	5,026	1,09,400	1,23,206
1931	..	5,481	3,506	74,288	1,07,333
1932	..	21,861	14,446	2,46,146	2,72,510
1933	..	35,664	24,560	5,59,723	5,97,946
1934	..	20,020	13,370	2,76,375	2,99,208
1935	..	4,070	2,453	1,13,418	1,13,567
1936	..	875	578	41,738	61,678
1937	..	781	506	62,271	1,25,136
1938	..	717	406	41,560	76,648
1939	..	2,430	1,472	80,200	1,58,517
1940	..	10,058	5,573	5,91,617	5,56,182
1941	..	8,752	5,311	3,32,437	3,42,437
1942	..	1,141	680	19,611	52,446
1943	..	1,355	715	2,04,843	2,87,590
1944	..	4,446	2,514	3,18,797	5,68,904
1945	..	18,124	11,779	6,62,330	13,01,969
1946	..	7,119	3,405	10,95,539	36,08,859
1947	..	7,851	3,081	9,25,708	12,95,628
1948	..	2,853	1,305	6,41,333	10,02,904
1949	..	2,302	1,139	5,39,770	11,79,756
1950	..	315	146	1,45,847	1,59,980
1951	..	25	7	74,874	1,48,127
1952	..	2	2	50,661	55,070

101. *Plague Organisation.*—The Plague Organisation has been working in the State since 1947. Since then it has conducted research work in the field for the control of plague by different methods and also carried out investigations for detecting any residual infection during the quiescent periods. Even though the incidence of plague was very low during 1951 and almost absent during the year under report, the epidemiology of plague being such that periods of low endemicity are not unknown and the disease is likely to recur after a period of lull, the staff of the plague organisation utilised this quiescent period for investigating the residual infection of plague, prevailing conditions favourable for its continuance and the possible formation of fresh endemic areas in the two districts of Satara North and Poona. In Satara North District the 44 villages including the 19 specially selected villages in the year 1951 were continued during the year for investigation of the variations in rat density and flea infestation. Some villages which reported rat falls were taken up for investigation of flea indices and rat density and plague preventive measures were also adopted in those villages whenever flea index was found significantly high.

Experiments with Warafarine were continued during the year in two villages. In Poona District, the post DDT plague investigation work started in the previously affected villages of Baramati and Indapur taluka in 1951 was continued during the year under report also and after completion of the same the rat and flea survey was carried out in some of the previously affected villages of the Baramati, Indapur and Dhond talukas. In all 62 villages of the above 3 talukas were tackled during the year. In these investigations some localised Zones of high flea indices were detected in some of the villages and they were therefore insufflated with 10 per cent. DDT as a preventive measure.

102. *Influenza.*—Deaths due to influenza recorded in the State during the year were 13 against 29 in 1951. Out of them 5 occurred in the rural areas and 8 in the urban areas. Greater Bombay had 3 deaths.

103. *Inoculation against Plague, Cholera and other epidemics.*—During the year under report, Government sanctioned a grant of Rs. 1,66,880 for inoculation against plague, cholera and other epidemics, against which an amount of Rs. 1,30,648 was spent on cholera vaccines insecticides, maintenance of anti-epidemic trucks etc. Expenditure on the pay and allowance of the anti-epidemic staff amounted to Rs. 40,981 (Pay—Rs. 20,404 and allowances Rs. 20,577).

## CHAPTER VI

### MALARIA

104. *Activities of the Malaria Organization.*—The activities of the Malaria Organization during the year 1952 are described under (1) Research activities, (2) Malaria Control Schemes, (3) Malaria Surveys and (4) Training of personnel.

105. *Research—(A) Entomological Investigations.*—(1) The bionomics of *Anopheles culicifacies*, the vector species in Poona, were investigated in a field study carried out at Vithalwadi, 6 miles from Poona City. Night collections of mosquitoes were made throughout the year in experimental huts specially constructed for the purpose. The investigations were still in progress at the close of the year. Briefly the results obtained so far are :

The adults of *Anopheles culicifacies* enter dwellings for purposes of feeding throughout the night but the bulk of them enter before mid-night, the peak period of activity being immediately after dusk. If opportunities are available for feeding, they take the blood meal soon after entry into dwellings. A certain proportions of females feed a second time even during the same gonotrophic cycle. The significance of these studies on malaria epidemiology is being further studied.

(2) A special study of the status of *Anopheles fluviatilis* in Kanara district, at the end of nearly six years of DDT indoor residual spraying operations, was made in the months of April-May and again in August 1952. The species has become extremely scarce, only 5 larvae having been found in searches totalling over 135 man hours in the most suitable breeding places. The fact that 5 specimens were found is significant indicating that the extinction point of the species has not been reached. Larvae of other anopheles species were found in practically the same numbers as before the malaria control scheme was introduced. In the routine collections which have been made throughout the year not a single adult specimen of *fluviatilis* has been found.

(B) *Chemical Investigations.*—An investigation on the possible effect of soils used for mud-plastering houses on the deterioration of DDT residual deposits was inaugurated and the work was still in its preliminary stages at the close of the year.

106. *Malaria Control Schemes.*—Malaria Control Scheme were in progress during the year 1952 in the districts of Kanara, Dharwar, parts of Belgaum, Thana, Ahmedabad, Kaira, Panchmahals, Bijapur, West Khandesh, Mulshi and Haveli talukas of Poona district, Sawantwadi taluka and Kudal Mahal of Ratnagiri district, Jalalpore village in Surat district and in Dangs. On the basis of the 1951 census, the total population directly benefiting from these schemes i.e., the population actually resident in the houses which were sprayed was 6,791,000 and the total population which can be regarded as indirectly benefiting was 11,468,000.

Out of the total population of 35 million living in Bombay State, about 20 million may be regarded as living in malarious areas, and nearly half of the latter had the benefits of effective malaria control during the year 1952. The malaria rates, such as, spleen rates, parasite rates and the dispensary statistics showed further reductions in the year 1952 and it can be safely estimated that over a million cases of malaria were actually prevented during the year.

The formulation of DDT used was an emulsion prepared in the field from a DDT solution in Aromex and soap. A small quantity of 50 per cent. water wettable powder was used in West Khandesh. The standard dosage adopted was 56 mg/sq. feet. except where stated otherwise.

A "DDT Operation Manual", setting down in detail the techniques of the spraying operations and the duties of all categories of personnel was prepared. The manual has enabled the standardisation of recording, reporting and compilation of data.

(a) *Kanara District Malaria Control Scheme*.—Malaria control first started in 1946 has now been in progress for 7 years. It may be noted that in Kanara and Dharwar districts the malaria control has been fully integrated with the other public health activities and each has two divisions, each with a Medical Officer of Health in charge. The number of villages sprayed and the quantity of DDT used in Kanara district are given below :—

Division.		No. of villages sprayed.	DDT (Technical) used in lbs.
Kanara East	...	768	15,727
Kanara West	...	326	15,525
Total		1,094	31,252

The results of the spleen surveys at the close of 1952 season were :—

No. of villages visited.	No. of children examined.	No. of children positive.	Spleen rate per cent.
96	4,138	15	0.3

*Note.*—There are no unsprayed malarious villages for comparison as all malarious villages have been included in the spraying programmes.

The cumulative spleen rates at the close of each season were :

1946	1947	1948	1949	1950	1951	1952
72.2	14.4	11.6	7.1	3.7	0.9	0.3

The number of patients treated for malaria in 12 selected dispensaries (*viz.*, Ankola, Gokarn, Kumta, Bhatkal, Siddapur, Sirsi, Mundgod, Manchikeri, Haliyal, Supa, Dandeli and Yellapur) were :

1944	1945	1946	1947	1948	1949	1950	1951	1952
54,166	43,813	32,095	28,252	17,455	15,353	11,903	8,019	5,854

(b) *Dharwar District Malaria Control Scheme*.—The malaria control in Dharwar district entered upon its 7th year in 1952. Only two rounds of spraying were carried out in most villages and the third round was given in selected larger villages only. This economy was possible because of the total failure of rains in the latter part of the monsoon.

The number of villages sprayed and the quantity of DDT used in Dharwar district are given below :—

Division.	No. of villages sprayed.	DDT (Technical) used lbs
Haveri ... ..	401	23,827
Dharwar ... ..	304	18,111
Belgaum District ... ..	67	2,848*
Total ... ..	772	44,776

\*Khanapur and Belgaum talukas are included in the Dharwar District Scheme for spraying purposes.

The results of spleen surveys at the close of 1952 season were :—

No. of village visited	No. of children examined.	No of children positive.	Spleen rate per cent.
96	6,478	75	1.1

The cumulative spleen rates at the close of each season were :—

1946	1947	1948	1949	1950	1951	1952
39.0	19.5	10.6	7.7	6.0	2.9	1.1

Total numbers of malaria cases treated in 8 selected dispensaries (Dharwar, Haveri, Hangal, Ranabennur, Hirekerur, Shiggavi, Kalghatgi and Mundargi) were :—

1944	1945	1946	1947	1948	1949	1950	1951	1952
45,155	31,753	17,422	18,498	13,958	12,969	11,231	9,146	5,522

(c) *Thana District Malaria Control Scheme*.—This scheme, originally started in 1948, entered upon its fifth year of operation in 1952.

The spraying programme followed was as follows :—

*First Round*—May and June ; *Second round*—August to October ; and *Third round*—October to December.

The total number of villages included in the spraying operations was 1404.

The total quantity of DDT (Technical) used was 53,113 lbs.

The results of the spleen surveys are given below :—

Taluka.	1946-47 (Pre-DDT) spleen rate.	1950-51 Spleen rate.	1951-52. Spleen rate.	1952-53.			
				No. of villages visited.	No. of children examined.	Number positive.	Spleen rate per cent.
Thana ..	40.1	17.7	9.6	6	230	11	4.7
Bassein . ..	48.9	17.8	7.3	4	161	5	3.1
Bhivandi . ..	37.1	16.1	6.3	6	320	6	1.9
Palghar ..	27.7	8.6	0.8	4	299	1	0.3
Dahanu ..	85.1	43.0	....	5	152	9	5.9
Umbergaon ..	49.8	24.5	....	4	192	12	6.2
Wada ..	53.1	18.9	4.0	6	369	23	6.2
Jawahar ..	18.6	11.7	....	1	129	2	1.5
Mokhada ..	41.0	28.5	....	9	422	8	1.9
Shahapur ..	35.1	10.8	7.1	6	442	15	3.4
Murbad . ..	41.3	10.1	4.0	5	368	10	2.7
Kalyan ..	22.1	14.8	3.9	3	181	3	1.6
Total ..	40.1	18.9	5.0	59	3,265	105	3.2

The cumulative spleen rate for the entire district at the end of 1952 was only 3.2 per cent.

The number of malaria patients treated in public dispensaries underwent further reductions. The data for 25 public dispensaries in the district were :

1946	1947	1948	1949	1950	1951	1952.
56,169	59,243	59,068	42,912	39,529	32,910	27,957

(d) *Ahmedabad District Malaria Control Scheme.*—The scheme was in its fourth year of operation during 1952. The total number of villages included in DDT spraying programme was 753, and the quantity of DDT (Technical) used was 67,048 lbs. Two rounds of spraying were carried out from July to October, except in a few

selected towns where a third round was also given. The dosage of DDT used was from 80 to 100 mg. per sq. ft. The data of surveys carried out to assess results are summarised below :—

Taluka.	1947-48 (Pre-DDT) spleen rate per cent.	1950-51 spleen rate per cent.	1951-52 spleen rate per cent.	1952-53			
				No. of villages visited	No. of children examined	No. with enlarged spleen	Spleen rate per cent.
1	2	3	4	5	6	7	8
City ..	39.2	7.3	5.9	7	897	35	3.9
Daskroi ..	39.5	7.7	4.3	7	905	31	3.4
Sanand ..	37.7	9.7	....	14	865	31	3.5
Viramgam ..	42.7	13.8	5.2	22	1,681	71	4.2
Dholka ..	35.7	13.1	5.5	13	1,504	58	3.8
Dhanduka ..	61.5	20.8	6.6	23	1,407	59	4.1
Dehegaon ..	....	6.3	2.8	15	1,076	34	2.0
District ..	43.4	18.0	5.0	101	8,385	319	3.8

The cumulative spleen rate for the whole district at the end of 1952 was 3.8 per cent.

The number of malaria cases treated in 10 public dispensaries since 1946 is as under :—

1946	1947	1948	1949	1950	1951	1952
22,857	19,714	15,310	16,039	14,843	10,898	11,644

(e) *Kaira District Malaria Control Scheme*.—The scheme, introduced in 1949, entered upon its fourth year of operations in 1952. From April 1951, the scheme has been placed under the charge of the District Health Officer. The total number of villages included for spraying was 452. 52,198 lbs. of DDT (Technical) and 72 lbs. of 50 per cent. wettable powder were used. The cumulative spleen rates in the different talukas are as under :—

Taluka	1947-48 (Pre-DDT) spleen rate per cent.	1949-50 spleen rate per cent.	1950-51 spleen rate per cent.	1951-52 spleen rate per cent.	1952-53			
					No. of villages visited	No. of children examined	Number positive	Spleen rate per cent.
1	2	3	4	5	6	7	8	9
Matar ..	42.8	24.4	7.8	3.3	13	1,173	15	1.3
Mehmedabad ..	25.0	24.9	11.3	1.7	12	995	19	1.9
Kapadwanj ..	23.8	22.9	11.8	1.8	13	1,043	16	1.5
Thasra ..	44.3	41.5	13.5	2.7	10	921	21	2.3
Cambay ..	....	....	16.1	5.8	14	764	20	1.6
District ..	32.5	9.9	11.2	3.1	62	4,898	91	1.8

The number of malaria patients treated in four public dispensaries of Kapadwanj, Mehmedabad, Matar and Thasra were :—

1945	1946	1947	1948	1949	1950	1951	1952
6,652	7,786	5,622	4,504	4,205	4,848	3,508	2,371

(f) *Bijapur district Malaria Control Scheme*.—This scheme was first inaugurated in 1949 and entered upon its fourth year of operation in 1952. Only the villages of former malarious sections of the district viz., Badami taluka and parts of Bilgi, Bagalkot and Hungund are sprayed with DDT. During 1952 three rounds of spraying were carried out. The total number of villages included in the programme was 216.

18,835 lbs. of DDT (Technical) were used. The cumulative spleen rates were :—

Taluka.	1952-53							
	1947-48	1949-50	1950-51	1951-52	No. of villages surveyed	No. of children examined	Number positive	Spleen rate per cent.
	(Pre DDT) spleen rate per cent.	spleen rate per cent.	spleen rate per cent.	spleen rate per cent.				
1	2	3	4	5	6	7	8	9
Badami	.. 32.5	15.8	11.3	4.4	12	956	40	4.1
Hungund	.. ....	....	5.2	3.7	5	356	14	3.9
Bagalkot	.. ....	....	0.0	1.8	6	354	17	4.8
Bilgi	.. 21.5	15.4	4.3	3.8	....	....	....	....
District	.. 30.6	15.7	7.6	4.0	23	1,666	71	4.2

The total number of malaria cases treated in three public dispensaries are shown below :

1946	1947	1948	1949	1950	1951	1952
8,318	13,102	10,109	5,076	3,888	3,056	2,700

(g) *Panchmahals District Malaria Control Scheme*.—This scheme started functioning in 1950 and the third year's operations were carried out in 1952.

A total of 1882 villages were sprayed during the year and 74,160 lbs. of DDT (Technical) were expended.

The results are shown below :—

Taluka	1952-53						
	1948-49 (Pre-DDT) spleen rate per cent.	1950-51 spleen rate per cent.	1951-52 spleen rate per cent.	Number of villages visited	Number of children examined	Number positive	Spleen. rate per- cent.
	2	3	4				
1				5	6	7	8
Godhra and Shehera.	37.1	10.5	12.0	14	748	62	8.2
Kalol ..	35.1	13.5	6.9	10	861	30	3.4
Halol ..	49.4	28.6	10.4	10	679	48	7.0
Dohad ..	49.0	22.4	15.1	10	698	49	7.0
Jhalod ..	67.6	44.5	13.2	11	750	54	7.2
Sant ..	41.0	13.3	....	....	....	....	....
Baria ..	36.6	20.4	7.9	4	387	22	5.6
Santrampur ..	....	....	10.9	8	511	31	6.0
Lunavada ..	37.6	20.5	12.3	11	655	39	5.9
District ..	43.8	19.6	11.2	78	5,290	335	6.3

The total number of patients treated in public dispensaries of Santrampur, Kalol, Kothamba, Dohad and Jhalod are shown below :—

1946	1947	1948	1949	1950	1951	1952
18,603	17,007	17,123	13,116	7,972	6,926	5,638

(h) *West Khandesh District Malaria Control Scheme*.—This scheme which was first inaugurated in 1950 was in its third year of operation in 1952.

The total number of villages included in the DDT spraying programmes was 1,508. The total quantity of DDT (Technical) used was 61,431 lbs. and the quantity of DDT 50 per cent. wettable powder used was 15,672 lbs. The dosage and the plan adopted for spraying during the two rounds was as follows :—

May and June—Spraying operations in Taloda, Nawapur, Shahada and Akrani Mahal and Akalkuva taluka using 50 per cent. wettable powder at a dosage of 112 mg. per sq. ft.

July and August—Spraying operations in the rest of the district, using DDT-Aromex emulsions at a dosage of 168 mg. per sq. ft.

September and October—Second round of spraying operations in the areas treated in May and June with wettable powder but at a dosage of 56 mg. per sq. ft.

The results of spleen surveys were as follows :—

Taluka	1952-53					
	1948-49 Pre DDT spleen rate per cent.	1951-52 spleen rate per cent.	No. of villages surveyed	No. of children examined	No. of children positive	Spleen rate per cent.
Dhulia	.. 33.8	6.5	16	1,617	58	3.6
Sakri	.. 39.5	6.7	4	134	7	5.2
Nandurbar	.. 32.5	5.7	10	664	25	3.8
Shirpur	.. 27.7	4.3	11	901	28	3.1
Chindkheda	.. 27.6	3.3	15	1,017	14	1.4
Paloda	.. 40.2	17.1	2	163	9	5.5
Akrani Mahal	.. 75.8	50.0	Not available.			
Akalkuva	.. 44.8	....	....	....	....	....
Shahada	.. 19.5	3.4	7	573	15	2.6
Nawapur	.. 48.1	7.1	15	934	174	18.6
District	.. 34.4	7.1	80	6,002	330	5.5

The numbers of malaria patients treated in 9 public dispensaries in the district are shown below :—

1947	1948	1949	1950	1951	1952
18,333	16,265	14,890	11,768	9,061	9,125

(i) *Mulshi and Haveli talukas in Poona district.*—Malaria control by DDT indoor spraying was in operation in 80 villages of Mulshi Petha and in villages of Haveli taluka.

Three rounds of DDT spraying were carried out in these villages and 5,860 lbs. of DDT (Technical) used. Malaria has been very effectively controlled in both the groups of villages.

(j) *Minor Schemes.*—In addition to the large district-wide schemes of malaria control referred to above, smaller schemes were in operation during 1952 in (1) 6 villages (including Sawantwadi town) in Sawantwadi taluka and 23 villages of Kudal Mahal in Ratnagiri district and (2) Jalal-pore town (Surat district). The quantities of DDT used in these schemes were 2,684 lbs. of DDT Technical in the former and 1,172 lbs. of DDT Technical in the latter.

*Dangs district.*—The malaria control operations in Dangs district were under the control of the Chief Medical Officer of the district.

In the areas in which malaria control schemes are in operation, the dispensaries show a reduction in number of malaria cases treated to the extent of about 2,00,000 cases. As these dispensaries cater only to one-sixth of the total population all of whom receive equal benefit from the control measures, the total reduction in malaria is estimated as 1.2 million cases during 1952.

107. *Malaria Surveys*.—Four survey squads, having completed the surveys in the districts of Banaskantha, Surat, Satara North and Satara South, were transferred in May 1952 to Amreli, Mehsana, Baroda and Sabarkantha districts. The surveys of the latter districts were in progress at the end of the year. With the completion of the surveys of these districts the Malaria Survey of the entire State would be completed and the Squads disbanded from 28th February 1953.

Brief summaries of the findings of the surveys are given below:—

(1) *Malaria Squad, Amreli*.—The following species of anopheles were found in the district:—

*A. annularis*, *barbirostris*, *culicifacies*, *fluviatilis*, *jeyporiensis*, *pulcherrimus*, *stephensi*, *subpictus*, *theobaldi*, *turkhudi*, *tessellatus* and *vagus*. 30 *annularis*, 4,323 *culicifacies*, 9 *fluviatilis*, 382 *stephensi* and 2 *pulcherrimus*, 166 *turkhudi* were dissected and none was found infected.

The results of the spleen and blood surveys are given below:—

Taluka	Spleen survey					Blood Survey				
	No. of villages visited	No. of children examined	No. positive	Spleen rate per cent.	No. of villages visited	No. of smears examined	No. Positive	Parasite rate per cent.	Species. V. F. M.	
1	2	3	4	5	6	7	8	9	10	
Amreli	..	19	1,216	88	7.2	Nil.	Nil.	Nil.	Nil.	....
Dhari	..	16	363	178	20.6	5	95	17	17.8	9 7 1
Damnagar	..	8	431	25	5.8	..	..	..	..	....
Ghogha	..	9	632	68	10.7	..	..	..	..	....
Khamba	..	8	419	142	33.8	4	85	8	9.4	4 4 0
Kodinar	..	12	932	188	20.2	6	131	17	12.9	2 15 0
Okha-Mandal	..	7	447	13	2.9	..	..	..	..	....
Total	..	79	4,940	732	14.9	15	311	42	13.5	15 26 1

Parts of Kodinar, Khamba, Gogha, Amreli and Dhari talukas were found to be moderately malarious.

(2) *Survey Squad, Mehsana*.—Following anopheles species were found in the district :—

*Annularis, culicifacies, stephensi, subpictus* and *turkhudi*. 2,006 *culicifacies*, 842 *stephensi* and 127 *annularis* were dissected and none was found infected.

### Mehsana District.

Taluka	Spleen survey					Blood Survey.						
	No. of villages visited	No. of children examined	No. positive	Spleen rate per cent.	No. of villages visited	No. of children examined	No. Positive	Parasite rate. per cent.	Species. V. F. M.			
Mehsana	..	20	3,462	34	0.9	Nil.	Nil.	Nil.	..	....		
Kalol	..	18	3,250	73	2.2	8	69	1	1.4	0	1	0
Kadi	..	12	2,303	80	3.9	6	49	Nil.	Nil.	....		
Ujjapur	..	40	6,061	39	0.6	8	82	1	1.2	1	0	0
Isnagar	..	10	2,013	37	1.8	..	..	..	..	....		
Atan	..	5	2,459	16	0.6	..	..	..	..	....		
Manasma	..	13	2,267	33	1.4	1	12	Nil.	Nil.	....		
Dhampur	..	5	4,192	44	1.7	..	..	..	..	....		
Bheralu	..	4	849	4	0.4	..	..	..	..	....		
Kadhanpur	..	8	1,413	190	13.4	5	98	1	1.02	0	1	0
Santalpur	..	7	442	61	14.0	..	..	..	..	....		
Mini Mahal	..	2	233	17	7.2	..	..	..	..	....		
Karij	..	1	319	4	1.2	1	8	..	..	....		
Total	..	145	29,263	632	2.1	29	318	3	0.9	1	2	0

The district as a whole should be regarded as healthy but sections of Kadhanpur and Santalpur talukas should be regarded as having a moderate incidence of malaria. These two areas as well as the Kakari-tappa area of Kadi and Kalol talukas require malaria control measures.

### Baroda District.

The following species of anopheles were found in the district :—

*A. annularis, culicifacies, fluviatilis, jamesi, pallidus, pulcherrimus, stephensi, subpictus, tesselatus, turkhudi* and *vagus*.

39 *annularis*, 3,852 *culicifacies*, 6 *fluviatilis*, 296 *stephensi* and 5 *turkhudi* were dissected and an infected specimen with sporozoites was found in the Karjan taluka in November 1952.

The results of the spleen and blood survey are given below :—

Taluka	Spleen survey					Blood Survey.				Species. V. F. M.		
	No. of villages visited	No. of children examined	No. posi- tive	Spleen rate per cent.	No. of villages visited	No. of children examined	No. Posi- tive	Parasite rate per cent.				
Baroda	..	19	1,327	166	12.5	20	29	2	6.9	2	0	0
Chota-Udepur	..	27	807	153	18.9	12	159	32	20.1	20	12	0
Dabhoi	..	9	616	99	16.0	3	26	7	26.9	5	2	0
Jambhugaum	..	11	491	89	18.1	3	40	8	20.0	4	4	0
Karjan	..	7	366	27	7.3	Nil.	Nil.	Nil.	Nil.	....		
Naswadi	..	10	481	57	11.8	Nil.	..	..	..	....		
Padra	..	8	949	63	6.5	Nil.	..	..	..	....		
Sankheda	..	18	706	112	15.8	8	75	13	17.3	8	5	0
Savli	..	23	882	97	10.9	5	69	68	11.6	7	1	0
Shinor	..	14	801	64	8.0	Nil.	..	..	..	....		
Waghodia	..	3	98	30	30.6	Nil.	..	..	..	....		
Total	..	149	7,524	957	12.7	33	398	70	17.6	46	24	0

The whole district should be regarded as malarious.

#### *Sabarkantha District.*

Following species of anopheles were found in the district :—

*Annularis, culicifacies, fluviatilis, pallidus, splendidus, stephensi, subpictus, turkhudi* and *vagus*.

1,939 *annularis*, 5,700 *culicifacies*, 24 *fluviatilis*, 470 *stephensi*, 2 *pallidus* and 7 *turkhudi* were dissected.

One *A. culicifacies* was found infected with sporozoites in Prantij taluka in November 1952.

The results of the spleen and blood survey are summarised below :—

Taluka	Spleen survey					Blood Survey.				Species. V. F. M.		
	No. of villages visited	No. of children examined	No. posi- tive	Spleen rate per cent.	No. of villages visited	No. of children examined	No. posi- tive	Parasite rate per cent.				
Himmatnagar	..	20	1,674	133	7.9	7	287	5	1.7	2	3	0
Modasa	..	29	1,971	128	6.4	7	292	13	4.4	6	7	0
Meghraj	..	14	2,300	34	11.3	1	13	1	7.7	1	0	0

Khedbrahm	..	11	427	100	23.4	8	271	24	8.8	12	12	0
Iddat	..	14	787	46	5.8	4	261	8	3.0	4	4	0
Prantij	..	12	1,696	119	7.0	4	160	13	8.1	6	7	0
Vijaynagar	..	10	227	37	16.3	3	35	3	8.5	1	2	0
Bayad	..	3	374	29	7.7	1	26	1	3.8	1	0	0
Total	..	139	8,143	736	9.0	49	1,660	83	5.0	42	41	0

The whole district should be regarded as malarious.

108. *Training*.—A training class of 4 weeks' duration was held in March-April 1952 at Poona and 17 candidates for posts of Malaria Supervisors, Malaria Assistants and Assistant Medical Officers underwent the course.

109. *Publications*.—The following technical papers were published during the year.

1. The validity of estimation of anopheles densities on the basis of and collection on a-timed basis from fixed catching stations by

Viswanathan D. K., Rao T. R. and Bhatia S. C.

Ind. J. Malariology, Vol. 6, No. 3, 1952.

2. Analysis of residual deposits of DDT on sprayed surfaces by

Viswanathan, D. K.

Ind. J. Malariology, Vol. 6, No. 2, 1952.

3. An exposure cell for use in residual insecticidal studies on mosquitoes by

S. C. Bhatia.

Ind. J. Malariology, Vol. 6, No. 2, 1952.

110. *Deaths from Malaria*.—During the year 24,335 deaths from malaria were recorded against 27,343 in 1951. The death rate was 0.66 in 1952 against 0.76 in 1951.

111. *Deaths from Malaria by Districts*.—The largest number of deaths due to malaria were recorded in the districts of Nasik (4,493 deaths), Poona (3,304) and East Khandesh (2,865).

112. *Relation of deaths from Malaria to deaths from fevers*.—During the year under report 2,48,989 deaths from fevers were reported of which 4,335 were attributed to malaria. The percentage of deaths from malaria to those from fevers was 9 as compared with 12 in 1951.

113. *Seasonal Mortality of Malaria*.—The months of August, September and October showed slightly higher incidence as compared with the remaining months of the year during which the incidence did not show much variation.

114. *Deaths from malaria in urban and rural areas*.—Among towns, higher number of deaths due to malaria were reported from Ahmedabad (668), Surat (196) and Malegaon (156) and in rural areas, in the districts of Nasik (3,986), Poona (2,979) and East Khandesh (2,437).

115. *Treatment facilities in rural areas.*—Arrangements were made for treatment of malaria cases with quinine and paludrine tablets through the touring staff of this department, e.g., Epidemic Medical Officers, Sanitary Inspectors, Vaccinators etc. The Mobile Hygiene Units, Anti-epidemic trucks and the Mobile Hospital Units were used when free from epidemic duty for carrying out medical relief in the rural areas including the treatment of cases of malaria. 1,36,811 cases of malaria in C. R. D., 1,29,219 in the S. R. D. and 58,050 in the N. R. D. were treated in the Civil Hospitals and Dispensaries and also by the staff of this Department in the different districts.

Distribution of anti-malarial drugs through the touring staff of the Public Health Department is given below :—

Tablets.		S. R. D.	C. R. D.	N. R. D.
Quinine (5 gr.)	.. ..	4,805	....	20,000
Mepacrine (1.5 gr.)	.. ..	28,567	7,708	35,000
Paludrine—				
300 mg.	.. ..	27,588	15,718	....
100 Mg.	.. ..	22,042	13,224	....
Quinine (1.5 gr.)	.. ..	14,119	15,254	....

116. *Distribution of quinine and quinine substitutes.*—During the year under report a grant of Rs. 73,000 was sanctioned by Government for (1) sale of quinine through Post Offices and (2) purchase of mepacrine hydrochloride tablets from the Government of India.

An amount of Rs. 1,539 was spent during the year towards postage and packing charges incurred for sale of quinine through Post Offices and for distribution of paludrine, mepacrine and quinacrine tablets. No stock of anti-malarial drugs was purchased by this Department during the year as there was sufficiency of stock and hence the amount sanctioned for its purchase was surrendered to Government. As a measure of economy in expenditure Government ordered that no further stocks of paludrine should be purchased and that, after the stock of paludrine with this Department is exhausted mepacrine tablets should be supplied free of cost to the Public instead of paludrine.

Mepacrine and quinacrine tablets worth Rs. 5,646 were distributed free to the Public. Paludrine worth Rs. 8,432 was issued for free distribution to indigent patients and for sale to others through the various distributing agencies like the officers and subordinates of the Public Health Department and the Revenue Department and the Administrative Officers of District School Boards.

A total sum of Rs. 5,241 was realised by the Assistant Director of Public Health, C. R. D., Poona, being the sale proceeds of quinine and paludrine tablets.

The cost of quinine substitutes and paludrine issued for distribution through School Boards and through Officers of Public Health and Revenue Departments was as under :—

Serial No.	District.	School Boards. Officers of the Public Health and Revenue Department.

## CHAPTER VII

## FAIR AND FESTIVALS

117. *Fairs*.—The Ashadhi fair held at Pandharpur every year is the largest fair in the State. During the year 1952 the fair was held from 23rd June to 16th July, the principal day being the 4th July. 1,75,309 pilgrims attended the fair and an amount of Rs. 86,352-8-0 was collected by way of pilgrim fees at the rate of Rs. 0-8-0 per pilgrim.

The District Magistrate, Sholapur, issued a Notification prohibiting entry into Pandharpur of persons not inoculated against cholera within the previous six months. Facilities for the inoculation of pilgrims were afforded by the Civil Surgeons and dispensary medical officers all over the State. Followers of Palkhis enroute to Pandharpur were inoculated by the staff of the Public Health Department. Arrangements were made at the two junctions viz. Miraj and Kurduwadi to inoculate pilgrims. The Pilgrim Committee, Pandharpur also made the necessary arrangements for inoculation at the various Nakas and Railway Stations, employing 70 inoculators and 20 Assistants for the purpose. 77,051 incoming pilgrims were inoculated. 13,899 inoculations were performed in the town before the commencement of the fair.

The Government staff performed 21,025 inoculations at Miraj and Kurduwadi. The total number of inoculations performed was 1,11,975. The rest of the pilgrims brought with them certificate of inoculation, which were checked by the staff of the Public Health Department consisting of 5 Epidemic Medical Officers and 10 Sanitary Inspectors. Pilgrims who had doubtful certificates were compelled to undergo fresh inoculation.

Various Palkhis from distant places come to Pandharpur for the fair. The District Health Officers through whose districts the Palkhis passed, made arrangements for the sanitation of the halting places of the Palkhis, detection and isolation of cases of epidemic diseases if any and for disinfection of water supplies. Special Medical Officers with requisite staff were appointed to accompany the three large Palkhis, viz., Shree Dnyaneshwar Maharaj, Shree Tukaram Maharaj and Shri Nivrattinath Maharaj. They were provided with adequate drugs, disinfectants and cholera vaccine. A truck fitted with water tank and pump accompanied each of these three Palkhis.

This year cholera broke out amongst the Palkhi followers of Shri Tukaram Maharaj at Kothale and Baramati in Poona District. However it was checked promptly.

Necessary arrangements for provision of water supply, trench latrines, bathing places, etc., were made by the Central Railway at Kurduwadi Railway Station, by the Barsi Light Railway at Pandharpur Railway Station and by the Pilgrim Committee at Wakhari. An ambulance

car was stationed at Wakhari with one Medical Officer and the necessary staff and medicines. The Bharat Scouts helped the Sanitary Inspector, Pandharpur, in maintaining cleanliness of the camp and sites for trench latrines. There was no out-break of any infectious disease in the camp. A temporary Infectious Diseases Hospital was opened at Kurduwadi. Two cholera cases from among the returning pilgrims were admitted in the Hospital on 7th July 1952 for treatment. Both these cases were cured and discharged on 12th July 1952. In addition 4 cases of diarrhoea were treated in the hospital. The District Health Officer, Sholapur, supervised the sanitary arrangements at Kurduwadi.

The Minister for Health and the Minister for Backward Classes, Fisheries and Rehabilitation paid a visit to Pandharpur on 4th July 1952 and saw all the fairs and sanitary arrangements.

Next in importance is the Kartiki fair at Pandharpur. This fair was attended by 115,297 pilgrims. The principal day was 29th October 1952. Anti-cholera inoculation was enforced at the time of the fair. The Pandharpur Municipality provided adequate sanitary and public health arrangements. The Deputy Minister for Health visited the fair on 29th October 1952 and inspected the arrangements. The Assistant Director of Public Health, S. R. D., Belgaum, camped at Pandharpur from 27th to 30th October 1952 and supervised the fair arrangements. An Infectious Diseases Hospital was opened at Kurduwadi by the Public Health Department. One case was admitted to the hospital for observation which however proved fatal.

The Kartiki fair at Alandi, Poona District, was held from 16th October to 18th November 1952. Nearly 76,000 pilgrims attended the fair. The Sanitary arrangements were organised by the Alandi Municipality with the assistance of the staff of this department. The Assistant Director of Public Health, C. R. D., Poona, visited Alandi and inspected the sanitary arrangements.

The Phalguni fair at Dehu was held from 11th to 18th March 1952, and attracted about 30,000 pilgrims. On 14th March cholera broke out among the returning pilgrims. Necessary preventive measures were immediately taken, to check the epidemic. The Assistant Director of Public Health, C. R. D., visited Dehu to investigate into the out-break of cholera and organize necessary measures.

The fair at Chinchli in Belgaum District was held from 10th to 16th February 1952 in honour of Goddess Shri Mayakka Devi. More than one lakh of pilgrims attended the fair. Besides a large number of cattle were brought. Necessary sanitary arrangements were made by the staff of the Public Health Department.

The Medical Officer from Raibag Dispensary attended the fair and treated the cases. The Assistant Director of Public Health, S. R. D., Belgaum, camped at Chinchali and supervised the sanitary arrangements.

The Banshankari fair at Cholchagud (District Bijapur) was held from 3rd to 25th January. Nearly 60,000 pilgrims attended the fair. All necessary sanitary arrangements were made. A Public Health stall was arranged and models and charts were exhibited.

The Exposition of St. Xavier's Body was held at old Goa from 2nd December 152 to 6th January 1953. As it was expected that a large number of pilgrims would be detained at Anmode pending examination by Custom Officials special sanitary arrangements were made at this place.

The fair at Shinganpur in Man Taluka, District Satara North, was held from 30th March to 10th April 1952. Approximately 70,000 pilgrims attended the fair. Necessary sanitary arrangements were made by the staff of the Public Health Department. The Dispensary Medical Officer, Dahiwadi, and the Veterinary Assistant Surgeon, Phaltan, attended the fair for giving medical aid to the pilgrims and the cattle.

The Jotiba fair at Wadi-Ratnagiri, Kolhapur District, was held from 8th to 13th April attracting nearly 60,000 pilgrims. The Public Health Department organised the necessary sanitary arrangements but the cost was borne by the Deosthan Mandal. The District Health Officer, Kolhapur, attended the fair and supervised the sanitary arrangements. The Dispensary Medical Officer, Panhala, attended the fair and treated 38 cases of minor diseases.

The Manekthari Punem fair at Dakor, District Kaira, was held on 21st October where about 50,000 pilgrims congregated. The necessary sanitary arrangements were made, which were supervised by the District Health Officer, Kaira.

#### *Other Fairs.*

Information regarding the remaining important fairs is furnished below :—(Adequate sanitary arrangements were made at all these fairs).

## CHAPTER VIII

## URBAN SANITATION

118. *Classification of Municipalities.*—There are 240 Municipalities in the State. Of these excluding the Bombay, Poona and Ahmedabad Corporations, Thana, Ahmednagar, Jalgaon, Bhusawal, Amalner, Chalisgaon, Dhulia, Nasik, Malegaon, Lonavla, Nadiad, Broach, Surat, Godhra, Navsari, Viramgam, Baroda, Satara, Karad, Sholapur, Barsi, Bijapur, Pandharpur, Belgaum, Nipani, Dharwar, Hubli, Gadag-Betgeri, Ratnagiri, Kolhapur and Ichalkaranji are Borough Municipalities. Yeola, Bagalkot, Gulelgud and Miraj are City Municipalities and the rest are District Municipalities.

119. *Number of Medical Officers of Health.*—During the year under report, Medical Officers of Health with medical degree and diploma or degree in Public Health were employed in Poona, Nasik, Baroda, Ahmedabad, Nadiad, Surat, Jalgaon, Ahmednagar, Sholapur, Pandharpur, Belgaum and Kolhapur Municipalities. Thana, Dharwar, Barsi and Bhusawal Municipalities employed licentiates with the Junior Health Officers' Examination Certificate (Bombay). The Ahmedabad Corporation maintained one qualified Deputy Health Officer in addition.

A B.M.S., Class II Officer was appointed as Medical Officer of Health for Mahableshwar and Panchagani towns.

120. *Number of Sanitary Inspectors.*—294 qualified Sanitary Inspectors were employed in 128 towns as below :—

Poona Municipal Corporation (57), Ahmedabad Corporation (18), Sholapur (14), Baroda and Surat (12) each, Poona Cantonment (7), Hubli, Kolhapur and Nasik (6) each, Kalyan (5), Belgaum, Bijapur and Malegaon (4) each, Dharwar, Gadag-Betgeri, Ahmednagar, Dhulia, Godhra, Navsari and Nadiad (3) each, Karad, Satara, Sangli, Phaltan, Miraj, Pandharpur, Barsi, Bagalkot, Baramati, Amalner, Deolali, Jalgaon, Thana, Petlad, Dabhoi and Patan (2) each and the following had (1) each :—Athani, Baithongal, Gokak, Belgaum Cantonment, Nipani, Saundatti, Ramdurg, Guledgud, Ilkal, Jamkhandi, Ranebennur, Haveri, Savnur, Byadgi, Haliyal, Honavar, Karwar, Ichalkaranji, Savantwadi, Vengurla, Malwan, Ratnagiri, Dapoli, Wai, Karad, Ashta, Mahableshwar, Panchgani, Vita, Kavathe-Mahankal, Akalkot, Lonavla, Junnar, Sangamner, Yeola, Igatpuri, Trimbak, Manmad, Bassein, Bhusawal, Chalisgaon, Erandol, Faizpur, Chupda, Dharangaon, Parola, Nandurbar, Shirpur, Savda, Yawal, Rawel, Pachora, Sinnar, Shrirampur, Panwel, Shahada, Bhagur, Bhiwandi, Taloda, Kopargaon, Kirkee Cantonment, Sirur, Dhanduka, Dholka, Viramgaon, Balsar, Rander, Billimora, Broach, Jambusar, Ankleshwar, Rajpipla, Dohad, Kapadvanj, Dakor, Anand, Umreth, Borsad, Sojitra, Palanpur, Mount Abu, Abu Road, Padra, Sidhpur, Kalol, Visnagar, Kadi, Vadnagar, Vijapur, Radhanpur, Unjha and Amreli.

121. *Municipal Sanitary Works.*—The officers of this department gave advice to the Municipalities in regard to water supply, conservancy, prevention and spread of disease and sanitary matters generally. Action was taken by many of the Municipalities on the suggestions. The following is the brief summary of some of the important items :—

The Nasik system of trenching night soil was adopted by Surat, Bulsar, Godhra, Ankleshwar, Sojitra, Dakor, Dohad, Kodinar and Jambusar. Disposal of night soil by composting was adopted by Vijapur, Balasinor, Rander, Abu Road, Dhanduka, Vagra, Umreth, Padra, Sidhpur, Gamdevi, Mehsana, Borsad, Sanand, Kalol, Baroda, Patan, Billimora, Viramgam, Nadiad, Dahegam, Navsari, Anand, Rander, Dabhoi, Dhari, Vadnagar, Chansma, Broach, Kaira, Palanpur, Kadi and Sinor Municipalities.

Minor sanitary works were carried out by some of the municipalities as shown below :—

Municipalities.	Brief description of the works carried out.
Gokak	Construction of surface gutters.
Saundatti	Construction of water reservoir and latrines.
Bijapur	Construction of gutters.
Bagalkot	Construction of gutters and latrines.
Jamkhandi	Construction of gutters.
Byadgi	Construction of gutters and urinals.
Dharwar	Construction of gutters.
Haveri	Repairs to urinals and gutters.
Laxmeshwar	Repairs to gutters.
Ranebennur	Repairs to gutters and latrines.
Savnur	Repairs to wells and construction of gutters.
Sirsi	Do. do.
Ichalkaranji	Do. do.
Kolhapur	Repairs to wells and urinals.
Malkapur	Construction of gutters and repairs to wells.
Panchgani	Construction of latrines.
Satara	Construction of surface drains.
Wai	Construction of gutters and latrines.
Kavathe-Mahankal	Construction of gutters and urinals.
Sangli	Do. do.
Vita	Construction of gutters and urinals and repairs to gutters.
Pandharpur	Construction of drains, latrines and repairs to gutters.

122. *Municipal Water Supplies.*—There are piped water supplies in 68 towns. Of these 42 towns received adequate protected water supply.

123. *Infectious Diseases Hospital.*—The control of the Infectious Diseases Hospital, Poona has been transferred to the Poona Municipal Corporation *vide* Government Resolution, Local Self-Government and Public Health Department, No. 2374 dated 14th July 1951.

The Bombay and Ahmedabad Municipal Corporations and the Municipalities of Ahmednagar, Sholapur, Dhulia, Surat and Pandharpur maintained their own Infectious Diseases Hospitals or Wards.

124. *Action taken by the Municipalities under the Municipal Acts and Bye-laws.*—Notices were issued in 24,226 cases by 128 Municipalities during 1952 under different bye-laws pertaining to Public Health matters. Of these 15,555 were complied with, 10,587 prosecutions (including pending for last year) were launched and 7,602 convictions obtained. Prosecutions in 1,649 cases were withdrawn.

---

## CHAPTER IX

### RURAL SANITATION

125. *District Health Officers.*—The Scheme for District Health Organisation is functioning in all the Districts of the State. The posts of District Health Officers of Poona, Banaskantha and Satara South remained vacant owing to paucity of duly qualified candidates. In Dangs District the Chief Medical Officer holds charge of the post of District Health Officer in addition to his own duties. The staff in each district consists of a District Health Officer, one Epidemic Medical Officer, 4-5 Sanitary Inspectors and a Sanitary Squad (per taluka), each consisting of one Mukadam and three mazdoors. In the Districts of Kanara and Dharwar, a slight variation is made in that instead of the District Health Officer for each District, two Medical Officers of Health are appointed in each of these Districts which are divided into two divisions. Each Medical Officer of Health is required to supervise and carry out all sanitary and anti-epidemic work in addition to Malaria Control measures.

Of the 27 districts in the State, 21 have been provided with a mobile van each (Dangs district has got two, while Broach and Panch Mahals have got a van for both districts together). Only the six newly formed districts after merger of States have no vans. These vans are intended for rapid movement of Public Health Staff and material during out-breaks of epidemics and for carrying out rural medical relief in non-epidemic periods.

The activities of the staff of the District Health Organisation were mainly directed towards the control of epidemic diseases, vaccination, propaganda by means of magic lantern shows, lectures and talks, management of fairs and festivals, disinfection of water supplies, inspection of rural and urban sanitation.

The Sanitary Squads were employed for cleansing villages, disinfection of drinking water supplies and infected materials in case of infectious diseases, construction of soak-pits and bore-hole latrines, removal of manure heaps from inhabited areas, etc. Vaccination and revaccination were carried out on a large scale.

126. *Epidemic Medical Officers.*—The services of Epidemic Medical Officers were mostly utilized for work in connection with epidemics such as Cholera, and treatment of cases of malaria. They visited villages for sanitation and control of epidemic diseases at the time of fairs. They also attended to general sanitation when there were no epidemics. During the non-epidemic periods their services were utilized for rural medical relief.

127. *Sirur Health Unit.*—The work of the Health Unit continued to be satisfactory during the year under report. 2,178 births and 938 deaths were registered in the area of the Unit. 61 omissions in the birth and death registers maintained by the village Patils were detected as against 68 in 1951. There were 37 attacks of smallpox with 5 deaths. 2,133 primary and 7,842 revaccinations were performed. There were two imported cases of cholera, neither of which proved fatal. 845 wells were disinfected and 1,441 persons were inoculated against cholera. The Unit area was free from plague. As regards the sanitary improvements, 90 villages were cleaned; 25 soak-pits constructed and 43 remodelled; 2 new latrines were built and 2 pit latrines were also constructed; 5 windows were fixed; 2 smoke outlets were prepared and one step well was converted into draw well.

The number of home visits paid by the staff of the Unit was 59,730. 273 clinics were held. The prenatal, post-natal, infant and preschool visits amounted to 48,330. 446 labour cases were conducted. 115 urine samples were also examined. The Unit continued to work as a training centre for Public Health workers. Subsidised Medical Practitioners were given training in Public Health work from 1st August to 17th November during the year. One batch of Sanitary Inspectors Class, Poona, attended training on rural sanitation for 15 days during December and students of the Sanitary Inspectors Class, Bombay, visited the Unit on 9th February for practical training in rural sanitation. 116 lantern talks on different subjects were given by the Sanitary Inspectors and Health Visitors. 25 Cinema shows and 4 exhibitions were held in the Unit area.

of this report (under Chapter XI, Maternity and Child Welfare). The work done by the Squads under the Sanitary Sub-Inspectors, at each of the Centres of Combined Units is given below :—

District.	Taluka.	Centre.	Wells		Baits.		Dead rats found.	Manure pits.	Pits led in.	Pits drained.	Vaccinations.	
			Disinfected.	Laid.	Consumed.	Primary.					Re-

129. *Land acquisition for relieving overcrowding.*—Opinion as regards suitability of extension of village site in respect of two villages in Banaskantha District and 5 in Sabarkantha District was given.

130. *Village Water Supply.*—Government placed an amount of Rs. 30,00,000 at the disposal of the Directors of Local Authorities of Divisions for execution of village water supply works.—

The following is the summary of the work done during the year :—

District.	No. of step wells converted into draw-wells.	No. of new draw-wells constructed.
Ahmednagar ...	...	44
Poona ...	40	35
Kolaba ...	...	4
Thana ...	...	38
Nasik ...	6	41

Kolhapur ...	29	...
Ratnagiri ...	32	36
Satara North ...	10	...
Satara South ...	4	...
Sholapur ...	24	6

131. *Guineaworm.*—93 villages from the talukas of Karad, Patan, Khatav, Khandala, Satara, Wai, Koregaon, Phaltan and Jawli of Satara North District reported guineaworm infection. The total number of patients recorded was 1,707. The villages were repeatedly visited by the anti-guineaworm workers and disinfection of 166 step-wells, 14 Addas, 26 hels and 35 zaras was carried out. About 26,926 lbs. of T. C. L. was utilised for the purpose.

*Satara South District.*—The disease was prevalent in the talukas of Khanapur, Tasgaon and Jath. Khanapur Taluka was worst affected and the next to it was Tasgaon. Disinfection of water supplies was carried out. In 2 villages step-wells have been converted into draw-wells. The Epidemic Medical Officer visited 7 affected villages and gave lecture on anti-guineaworm measures. Posters on guineaworm were displayed to the Public.

*Sholapur District.*—The Sanitary Inspectors visited 22 affected villages and disinfected 35 wells with T. C. L. Five persons suffering from guineaworm were treated, and villagers were advised to convert step-wells into draw-wells.

*Belgaum District.*—51 villages were affected by guineaworm and 568 persons were suffering from the disease. 287 sources of drinking water were disinfected.

248 lbs. of T. C. L. was used. Revenue authorities were requested to take up the work of conversion of step-wells into draw-wells.

*Bijapur District.*—The guineaworm disease was widely prevalent in the district. Out of 351 villages in which step-wells are sources of water supply, 50 selected villages have been given priority for conversion of step-wells into draw-wells by the District Development Board. Government has been requested to sanction funds and the work is expected to be taken up in hand during the next year. The wells were treated with T. C. L.

*Dharwar District.*—As usual, Anti-guineaworm workers were appointed for taking anti-guineaworm measures. 294 cases of guineaworm were detected in 29 villages and all the 83 sources of water supplies were disinfected with strong dose of T. C. L. repeatedly after every 10 days during the season. 588 lbs. of T. C. L. were used for the purpose.

*Haveri Division.*—91 villages were affected by guineaworm disease. In all 1,061 persons suffered from the disease. 72 draw-wells, 45 step-wells and 68 ponds were disinfected with T. C. L. 244 lbs. of T. C. L. were used.

*Kolhapur District.*—The infection was reported from only one village of Radhanagari Taluka. Necessary preventive measures were adopted.

132. *District Development Boards.*—The District Development Boards were functioning in all the Districts of the State to assist and advise all officers engaged on or connected with schemes of Rural Development approved by Government and to formulate schemes for improvement of rural areas for the consideration of Government. The Boards spent funds at their disposal on schemes of District Development approved by Government. During the course of their tour Sanitary Inspectors of this department delivered lectures to the villagers on water supply, removal of refuse and night soil, grow more food, general sanitation,

conversion of step-wells into draw-wells, importance of fresh air and ventilation, personal hygiene, epidemic diseases and their prevention, balanced diet etc. Classes in village sanitation were also held by the Inspectors at Taluka Head quarters for village Police Patils and Secretaries of Village Panchayats.

The following is the resume of improvements carried out in villages in the different districts during the year :—

*District Development Board, Sabarkantha.*—The Board collected information in respect of villages badly in need of water supply and selected 73 villages in order of priority for taking up works. Out of these 29 works were being carried out during the year. With a view to eradicate guineaworm the board has decided to prepare list of step-wells and take up the work of converting them into draw-wells according to priority. Intensive and extensive propaganda on preparing farm yard manure and compost manure was carried out by the board through the District Agricultural Officer. 461 and 301 compost and Farm yard pits were dug and filled in respectively.

*District Development Board, Ahmedabad.*—The Board spent an amount of Rs. 3,600 on village water supply.

*District Development Board, Kanara.*—Under the Subsidy Scheme, the Board carried out construction of 38 new wells and carried out repairs to 17 old wells. The construction of 6 pucca and 1,160 katcha bandharas was also carried out.

*District Development Board, Nasik.*—83 wells for drinking water and 53 latrines were constructed.

*District Development Board, Bijapur.*—The Board granted an amount of Rs. 200 to village Hittinhalli, taluka Bijapur, for removal of silt from the well.

*District Development Board, Baroda.*—Taluka Development Boards in the District took alround and energetic measures to improve the health condition of the Rural Population. Health services preventive and curative were rendered and Medical aid was given. The Boards attended to sanitary measures in villages and carried out disinfection of water supplies, rat destruction and educative health propaganda. eight new wells were constructed. Government help was given to repair old wells in Chhota Udepur, Jabugam and Waghodia Talukas.

The Board organised observance of Gram Sudhar Saptah all over the Districts for ten days. During the Saptah cleaning of villages and repairing of roads was carried out. Most of the wells and 227 tanks were cleaned. 4,614 compost and Farm yard manure pits were dug and 2,992 were filled.

*District Development Board, Kolaba.*—The Board converted a step-well at village Kamath, taluka Alibag, into a draw-well. The work of step-well at Pacchapur in Sudhagad Mahal was taken up in hand. A complete list of step-wells in the District has been supplied to the Public Works Department for preparation of plans and estimates for converting them into draw-wells. The villagers were advised to dig trench latrines.

*District Development Board, Satara North.*—The following work was done by the Board through the villagers :—

The villagers dug one drinking water well at Alajapur in Phaltar Taluka.

The villagers of Masur, taluka Karad, cleaned one public well.

Ten trench latrines were prepared at Sherichiwadi, taluka Phaltan and one trench latrine was prepared at Kival in Karad Taluka.

The residents of 30 villages constructed village approach roads, of the total length of 26 miles and the residents of 10 villages repaired village approach roads 9 miles in length. The residents of 5 villages started construction works of 5 school buildings and the villagers of 2 villages started construction of chawdi buildings.

3,055 compost and farm yard manure pits were dug by the residents of different villages out of which 2,693 were filled in by them.

The villagers of various villages cleaned 150 tank beds.

Out of 207 well works from Karad-Patan, Man and Khatav Talukas selected by the Board, plans and estimates for 139 were prepared and approved. Out of the 139 works, 97 were taken in hand and 11 were completed during the year 1952. 33 works have been completed since the beginning of the scheme. Out of the remaining 64 works, 27 were in progress and the remaining 46 have been held up.

*District Development Board, Broach.*—Disinfection of wells was carried out periodically. No manure heaps were allowed to be stored near wells, the water of which is used for drinking purposes. One well was repaired, a new well was constructed and nine tanks were deepened. A grant of Rs. 500 was given to the Sanitary Association, Broach, for celebrating Nitya and Health Week.

*District Development Board, Belgaum.*—A cattle show at Turkewadi and Agricultural Exhibition at the Sarvodaya Centre, Narashinpur, were held in the District. Models and posters were explained to the visitors. Cinema films were also screened.

*District Development Board, Satara South.*—During the Gram Sudharaptah and on Harijan Day all villages were got cleaned and refuse pits were used for compost manure. Harijan localities were cleaned. In

the villages of Kupwad, Kawalapur, Moghamwadi and Kawathepiran (Taluka Miraj) four step-wells were converted into draw-wells with a view to check the spread of guinea worm disease. Two tank beds were cleaned in Khanapur Taluka.

*District Development Board, Thana.*—The Board arranged Health Exhibitions at the time of Agricultural and cattle shows at Vakapad (Peta Mokhada), Mhasa (Taluka Murbad) and Palghar (Taluka Palghar). With a view to carry out village improvement works a "self help" programme was launched with the co-operation of the villagers and social workers. Village approach roads, new wells, trench latrines etc. were constructed. Wells were repaired. Cleaning of roads and gutters was carried out. 9,225 compost and farm yard manure pits were dug and 8,611 farm yard manure and compost pits were filled.

133. *Gram Sudhar Saptaha.*—The fifth Gram Sudhar Saptaha was observed from 2nd to 11th October 1952. The programme consisted of—

- (1) Cleaning of the villages and using the refuse for composting.
- (2) Digging of compost pits and filling them.
- (3) Collecting refuse etc.
- (4) Demonstrating the proper method of preparing compost manure.
- (5) Demonstrating the improved method of preparing farm yard manure.
- (6) Demonstrating the various methods of conserving and utilising cattle urine for manuring.
- (7) Explaining to the villagers the proper methods of utilising night soil and human urine for manurial purposes.
- (8) Construction of trench latrines and pits to be used as urinals.
- (9) Planting of trees.
- (10) Treating water supplies.

134. *World Health Day.*—Seventh of April 1952 was observed as the World Health Day throughout the State. Processions and meetings were organised at which the importance of the day was explained to the people. Health Exhibitions and cinema shows were arranged. Model charts, posters were exhibited and explained to the public. Leaflets on different health subjects were distributed. Intensive cleansing of places was also undertaken.

## CHAPTER X

### HOUSING—URBAN AND RURAL

135. *Housing in Urban and Rural Areas.*—Whenever the Town Planning Department found it not feasible to develop the land under the Bombay Town Planning Act, the Department tried to develop such areas without recourse to the Act with a view to improve better living conditions in cities, urban and suburban areas. 13 layouts in Northern Division, 10 in Central Division and 9 in Southern Division were prepared.

In addition 75 layouts were received from the various Local Authorities for scrutiny and advice. Similarly about 90 cases of layouts were received from the Revenue Authorities which were duly scrutinised and modifications suggested wherever found desirable. Layouts were also received from some of the Co-operative Housing Societies for scrutiny and advice and were duly dealt with.

Three new branch offices of town planning and valuation department, two at Baroda and Kolhapur as a result of merger of the Gujarat and the Deccan States respectively and one at Kalyan for the development of the Ulhasnagar Township and Mulund and Chembur relief Colonies, continued to function. The layouts of the Chembur, Mulund and Akbar Relief Colonies were prepared by the Kalyan branch office. About 2,000 applications for allotments of plots in the various colonies were referred to the Kalyan Branch Office by the various authorities for opinion and advice and thousands of displaced persons sought technical advice of the branch office in selecting plots for rehabilitation.

During the period under review, 720 building permissions were referred and disposed of according to the building regulations. The building permission cases were also received for opinion from the various Local Authorities in respect of Town Extension Schemes in Baroda and the total cases scrutinised and disposed of were over 100.

136. *Housing Societies.*—The total number of housing societies in the State stood at 927 as against 857 at the end of the previous year. A total amount of loan sanctioned under the housing schemes at the end of the year was Rs. 112.72 lakhs.

137. *Housing for Backward Classes.*—For the amelioration of backward classes special scheme was sanctioned with a view to raise their standard of living by providing cheap houses. Financial and other assistance such as providing Government lands free of cost, acquiring Government land at Government cost, was given for establishment of housing colonies. Loans to the extent of 75 per cent. of the cost of a house estimated at Rs. 2,000 in ordinary tract and Rs. 1,500 in backward tract respectively were given. During the year loans to the extent of Rs. 7,35,375 were sanctioned to 15 colonies. An additional loan of Rs. 49,500 was sanctioned to two societies. Loan of Rs. 8,025 was also sanctioned to 7 individuals residing at places where there were no possibilities of organising co-operative housing societies. A subsidy of Rs. 1,045 was sanctioned to 5 societies for meeting management expenses. The total amount of loans and subsidies sanctioned to the societies and individuals under the scheme amounted to Rs. 12,49,465 and Rs. 2,970 respectively at the end of the year.

138. *Housing for Flood Victims in Ahmednagar District.*—Under the special scheme sanctioned by Government for the resettlement of the victims affected by the ravages of the floods of the Mula and Pravara rivers in Ahmednagar District, the societies formed under the scheme showed steady progress in their work of construction of houses. During

the year, additional loans to the extent of Rs. 5,250 were sanctioned to two societies bringing the total amount of loans sanctioned to Rs. 16·21 lakhs to 22 societies. An amount of Rs. 21,812 was disbursed during the year to 8 societies on account of payment of second interest of the loans sanctioned to them. The total number of houses constructed was 655 and that of houses under construction was 377 at the close of the year.

For the amelioration of housing conditions of the Halpatis (a backward class community) in Surat District a sum of Rs. 84,000 was sanctioned as loan. At the close of the year, 152 tenements have been constructed.

With a view to help the displaced persons from Pakistan to construct their houses loans to the extent of Rs. 2,97,904 were sanctioned to two societies by Government during the year and the total amount of loan sanctioned under the scheme was Rs. 23·76 lakhs.

The Housing Society of factory workers in Mehsana District was granted a loan of Rs. 3·36 lakhs for construction of 168 houses for its members.

In the year 1950, Government sanctioned a scheme called "The Scheme Co-operative Housing Societies for Dangis" the main object of which is to provide sanitary houses to the Dangis consisting of Bhills and Kunbies, through the agency of the co-operative housing societies. The Scheme envisages grant of financial assistance and other facilities to the Dangis for meeting their housing needs. So far 6 societies are registered under the scheme. During the year under report 286 houses were constructed. The amount of Rs. 2,61,000 was sanctioned, out of which Rs. 2,42,465 was disbursed.

139. *Housing Colonies of the Bombay Housing Board.*—During the post-war period the housing problem became very acute and assumed large proportions. The unrestricted growth of cities without planning, the continuous influx of displaced persons, the scarcity of building materials and their abnormal prices were the main factors contributing to the creation of the housing problem. There was very little activity in the private sector and the local authorities did not also undertake the building activities. It therefore became expedient for Government to take timely measures to prepare housing schemes and carry out works as were necessary and with this object in view Government set up Bombay Provincial Housing Board, which formulated and executed housing schemes.

The number of tenements constructed for the Industrial workers of Bombay and Ahmedabad were as shown below :—

			Type and number of Tenements.		
			1-Room	2-Room	3-Room.
Bombay	...	...	392	661	32
Ahmedabad	...	...	36	420	24

Eight hundred one-room, 1,208 two-room and 350 three-room tenements for the low group people were constructed at Worli, Khar, Santacruz, Kule-Kalyan, Goregaon and Ghatkopar. Besides the construction of these, a number of military camps have been taken over by the Board and made available for residential accommodation after re-conditioning and providing various amenities. Thus 976 one-room and 339 two-room tenements were made available at Worli, Sion-Matunga, Bandra, Dharavi, Kakori, Machhlimar and Borivli.

In addition to the above the Board constructed 576 tenements at Sholapur, 368 tenements at Hubli, 384 tenements at Khokhra-Mehmedabad, Ahmedabad and 262 tenements at Rakhial, Ahmedabad.

All the buildings are provided with necessary drainage and water supply facilities. The tenements are also electrified. All the camps except Sion-Dharavi have been electrified. Independent staff has been maintained by the Board in all its assets for keeping them clean and tidy. In most of the colonies the Board has constructed shopping blocks, containing 3 to 4 shops for daily necessities of life. Milk centres, and co-operative consumers' stores are located in almost all colonies. The recreation centres conducted by the labour welfare centres provide facilities to industrial workers residing in the colonies for industrial group at Bombay and Ahmedabad. Accommodation where possible has been provided for office room of tenants Association, Primary schools, dispensaries etc. During the year the Board continued the deposit contribution work for Juhu, Vile Parle Development scheme for co-operative housing society. The total expenditure incurred on this work during the year ending was about 3.53 lakhs. Special repairs to the tenements at Kakori and Machhlimar were carried out at a cost of about Rs. 2.60 lakhs. *Aqua privies* at a cost of about Rs. 0.16 lakhs have been provided in the camp at Borivli. Asphalt Road at a cost of about Rs. 0.19 lakhs has been constructed in the colony at Worli neighbourhood unit area. The works as shown below were in progress:—

Name of work.	Estimated Cost.
The work of constructing 720 two-room tenements in storied R. C. C. buildings, of permanent type with pile foundation, having an independent bath and a water closet, at Worli neighbourhood area.	35.24 lakhs.
The work of construction of 120 tenements of permanent type with R. C. C. Slab, having independent bath and water closet for industrial labour, at Malek Saban, Ahmedabad.	4.17 lakhs.
Work regarding improvements to the reconditioned military hutments at Sion-Dharavi.	3.66 lakhs.
The work of development of land at Chembur	5 lakhs.
The work of development of land at Goregaon was in progress.	

*Housing conditions for displaced persons.*—With a view to providing permanent housing accommodation to displaced persons Government

has undertaken constructions of two townships at Kalyan and Ahmedabad known as Ulhasnagar and Sardar Nagar. In addition to these townships temporary camps were converted into permanent colonies by renovating the existing barracks or by undertaking new constructions. During the year under report the following new works were undertaken by Government :—

Ulhasnagar ..	5000 tenements.	Pimpri, Poona.	840 tenements.
Sardarnagar ..	900	Warshia lines—	
Mulund ..	300	Baroda ..	584
Wadia Trust—		Sholapur ..	100
Estate Kurla ..	600	Ahmednagar ..	100

The actual expenditure on the above construction during 1952 has been in the neighbourhood of Rs. 150 lakhs. In addition an amount of Rs. 21.30 lakhs has been advanced to 5 co-operative housing societies and to Harijan Sevak Sangh. Arrangements for water supply were also made at the above places. Government has opened either small hospitals or dispensaries at almost all the displaced persons townships or colonies. During the year under report no epidemic of any significance was prevalent in those townships or colonies. Government has sanctioned construction of six primary schools at Ulhasnagar and one each at Sardarnagar, Pimpri, Mulund and Valivade.

## CHAPTER XI

### MATERNITY AND CHILD WELFARE

140. *The Bombay Mothers and Children Welfare Society.*—The number of Maternity and Child Welfare Centres affiliated to the society was 23. The following grants were distributed by the society to different centres :—

				Rs.
(1) Grants to Mofussil Centres ...	...	...	...	17,145
(2) Expenditure on Welfare Units :—				
Khed	...	...	...	17,720
Bhilawadi	...	...	...	26,455
Waduth	...	...	...	6,460
Palghar	...	...	...	23,040
Miri	...	...	...	5,295
Garbada	...	...	...	2,035

Total ... } 98,150  
of (1) & (2) }

The Society runs two health schools, one each at Khed in Poona District, and Bombay, for the training of Health visitors.

Training of dais, assistant midwives and midwives is also undertaken by the society. 92 dais and 18 candidates for the diploma of midwives were trained during the year and 30 and 16 candidates respectively were under training.

The work done by the various centres of the society is summarised below :—

Number of expectant mothers directed to Maternity institutions in all Centres and Units.	2,125
Number of deliveries during the year ... ..	5,663
Number of 1st visits paid to expectant Mothers by the Health Visitors in their homes.	4,255

The Society received the following grants from Government during the year 1952-53 for its various activities shown below :—

	Rs.
<i>Maternity and Child Welfare Work in rural areas</i> ...	13,000
Touring Lady Doctor ...	2,000
Health Propaganda in Gujarat ...	1,500
Poona Health School ...	10,000
Bombay Health School ...	10,000
Training of Dais ...	10,000
Rent for the rooms occupied by the Society in B. D. D. Chawls.	1,584
Towards the maintenance of Welfare Units ...	40,000

141. *Combined Medical and Public Health Units.*—Twenty-three centres of Combined Medical and Public Health Units on the basis of one per taluka have been established in the districts of Surat, Satara, Sholapur, Belgaum, Bijapur, Poona, Ahmednagar, Ratnagiri, Thana, Nasik and West Khandesh, for carrying out sanitary improvement work and for providing maternity and child welfare service in a group of four to six villages comprising of 8,000 to 10,000 population within a radius of three to five miles. The staff sanctioned under each centre is as shown below :—

Subsidised Medical Practitioner (Allopathic) trained in Public Health.

Maternity Unit	Sanitary Unit
1 Health Visitor	1 Sanitary Sub-Inspector.
1 Midwife	1 Mukadam.
1 Trained Dai	3 Sanitary Orderlies.
1 Woman attendant.	

Work done by the Maternity staff at each of the centres of combined Medical and Public Health Units is given below :—

District	Taluka	Centre	Advice given to			Domiciliary confinements attended	Cases treated	Labour cases attended at the centres
			Ante-natal	Post-natal	Infants	Toddlers		
Satara	... Satara	... Nagthana	757	563	1,044	573	140	105
Do.	... Koregaon	... Koregaon	816	785	895	759	267	112

142. *Measures taken to reduce infant mortality.*—The work regarding Maternity and Child Welfare was mostly carried out by the voluntary societies and institutions.

### *Northern Registration District*

*Surat.*—There are seven maternity and child welfare centres in Surat town out of which one is maintained by the Municipality. Twenty midwives have been attached to these centres.

*Broach.*—There are six maternity homes in the town out of which one is maintained by the Municipality. A midwife is attached to each maternity home.

*Ahmedabad.*—Ahmedabad Municipality maintained Chinoy and Saraspur maternity homes. Besides, the Municipality has engaged two lady doctors, three health visitors and thirteen midwives.

A maternity home is maintained each by Ankleshwar, Umreth, Nadiad, Dholka, Prantij, Dhandhuka, Viramgaum, Modasa, Visnagar, Patan, Unzha, Kalol, Vadnagar, Kadi, Chanasma, Dhima, Sidhpur, Dohad, Dharmaj and Radhanpur municipal towns.

The District Local Boards, of Surat, Ahmedabad and Broach, maintained three, two and one midwives respectively.

### *Southern Registration District*

*Sholapur.*—There were four maternity homes in the town of which one is maintained by the Sholapur Municipality. Four doctors and 15 midwives have been attached to these maternity homes.

*Barsi.*—There were Three maternity homes in the town, of which one is maintained by the Barsi Municipality. Four doctors and Four midwives have been attached to these maternity homes.

*Sirsi.*—Shri Marikamba Maternity Home maintained one doctor and one midwife.

*Lonand.*—There were two maternity homes in Lonand town. One doctor, one nurse and one midwife have been attached to these maternity homes.

*Wai.*—The General Hospital and the Wills Pierce Hospital at Wai maintained two doctors and four midwives.

*Satara City.*—There was one maternity home in Satara City. One lady doctor and two midwives have been attached to the maternity home.

*Mahableshwar.*—There was one maternity home maintained by the Municipality and one medical officer and one midwife are attached to it.

*Vaduj.*—There was one maternity centre maintained by the District Local Board, and one medical officer and one midwife are attached to it.

*Central Registration District, Poona.*—There were 9 maternity homes in Poona City and Poona Cantonment, out of which one each was maintained by the Poona Municipal Corporation and the Poona Cantonment. Ten doctors (including 2 Honorary), 3 Health Visitors, 9 nurses and 6 midwives were attached to these maternity homes.

*Alandi.*—The Alandi Municipality maintained one maternity home and one doctor, one Health Visitor and one midwife were attached to it.

*Lonavla.*—There were 3 maternity homes in Lonavla town of which one was maintained by the Lonavla Municipality. Four Health Visitors and one midwife were attached to these maternity homes.

*Baramati.*—There were 4 child welfare centres and 2 maternity homes in Baramati town of which one Child Welfare Centre was maintained by the Municipality and one Health Visitor and 2 Nurses were attached to these.

*Dhond.*—There were 6 maternity homes in Dhond town of which one was maintained by the Municipality. One lady doctor, 3 resident doctors and one nurse were attached to these maternity homes.

*Nasik.*—There were 14 maternity homes in Nasik City out of which one was maintained by the Municipality. 30 nurses and 15 midwives were attached to these maternity homes.

*Malegaon.*—Malegaon municipality maintained one maternity ward and 1 lady doctor and 2 nurses were attached to it.

*Igatpuri.*—There was one private maternity home at Igatpuri and one midwife was attached to it.

*Sinnar.*—There was one municipal maternity home at Sinnar and one midwife was attached to it.

*Nandgaon.*—There was one municipal maternity ward at Nandgaon with a full time midwife.

*Nasik Road and Deolali.*—There were 2 maternity homes with a staff of 2 doctors and one midwife.

*Bhiwandi.*—There was one maternity home at Bhiwandi with 1 honorary doctor and 2 nurses are attached to it.

*Matheran.*—Matheran Municipality maintained one maternity home with 1 nurse and 1 midwife.

*Roha-Ashtmi.*—There was one municipal maternity home and one midwife was attached to it.

*Bhusawal.*—There were 3 maternity homes in Bhusawal town of which one was maintained by the Municipality.

*Amalner.*—There were 3 maternity homes of Amalner of which one was maintained by the Municipality and 6 midwives have been attached to these maternity homes.

*Nandurbar.*—There was one maternity home at Nandurbar and one nurse was attached to it.

## CHAPTER XII

### SCHOOL HYGIENE AND MEDICAL INSPECTION OF SCHOOL CHILDREN

143. *School Hygiene and Medical Inspection of School Children.*—Schools were visited from time to time, during the course of their visits for vaccination work, by the Vaccinators or for inspection thereof by the Sanitary Inspectors. Besides, the Sanitary Inspectors took the opportunity of giving instructions to the school children on personal cleanliness, school hygiene, cholera, plague and vaccination and the protection afforded by vaccination against small-pox.

Instructions in health and hygiene are imparted in primary schools. In standard VII of Boys' schools, physiology and hygiene are subjects for the course prescribed for that standard and for examination, questions on hygiene are set. In Girls schools, hygiene is taught as one of the regular subjects of instruction. In the course of studies in primary training institutions for men, the subjects of "Hygiene" and "Physiology" have been prescribed for the second year class, while in the training institutions for women, these subjects have been prescribed for the first year and "Domestic Science" for the Second year class. Equipped with the knowledge of the subjects the teachers are in a better position to pay attention to children's cleanliness, correct sitting posture, proper holding of books, etc. Care is also generally taken by the school authorities to see that the school houses are as far as possible well lighted and ventilated.

Propaganda work in school hygiene is done by way of lectures, demonstrations and magic lantern slides. The Visual Instruction Branch of the Educational Department also demonstrates in rural areas with the aid of illustrated lectures, the principles of cleanliness and sanitation. The subject of health and hygiene forms an important part of the propaganda of the Visual Instruction Branch.

Magic lantern shows were arranged by the staff of the Public Health Department in schools which were found to be very useful in educating the school children in public health matters.

*Medical Inspection of Children.*—Schemes for medical inspection of school children were in force in the District Local Board areas of Surat and Broach and the Municipalities of Bombay, Ahmedabad, Poona, Hubli, Gadag, Surat, Sholapur, Satara City, Jalgaon and Ahmednagar cantonment. The statistics of inspection are furnished below :—

## CHAPTER XIII

## HEALTH PROPAGANDA

144. *Propaganda by means of films, models gramophone etc.*—There is a propaganda van in the Public Health Department equipped with sound projector, films on health subjects a gramophone with records and models on health subjects. Health education was carried out with the aid of this van in the districts of Bombay Suburban, Thana, Belgaum, Ratnagiri, Sholapur, Poona and Ahmednagar during the year 1952. Films on different health subjects were screened during the course of its tour in the rural areas of the above districts. The van visited 64 villages and gave 153 film shows. The van was specially deputed to Pandharpur for carrying out propaganda at the time of Ashadhi fair.

145. *Exhibitions.*—The Public Health Department took part in the following exhibitions and agricultural and cattle shows by putting up stalls with posters, charts, models and exhibiting films on various health subjects:—

Agricultural and Cattle show at Chanda, taluka Newasa, district Ahmednagar.

Agricultural and Cattle show at Kopargaon, district Ahmednagar.

Agricultural and Cattle show at Kanher, taluka Parner, district Ahmednagar.

Exhibition at Shivaji Maratha High School, Poona City.

International Industrial Fair at Bombay.

Agricultural and Cattle show at Ahwa (Dangs).

Vegetable, Fruit, Flower and Sanitary show at Mahableshwar.

Agricultural Exhibition at Sangli.

Baby show in Belgaum town.

Cattle show at Turkewadi, district Belgaum.

Agricultural Exhibition at Sarvodaya Centre, Narasingpur, district Belgaum.

Health, Exhibition at Kantharia, taluka Broach, district Broach

During the course of his tour the operator of the propaganda van arranged exhibitions with the help of models and posters at Kalyan, Murbad, Sholapur, Maswan, Palghar, Belgaum and 10 villages of Ratnagiri District and also at the Shivaji Maratha High School, Poona City.

146. *Propaganda by means of magic lanterns and slides.*—2297 magic lantern lectures and 6,402 talks were given by the staff of the department during the course of their tours in 5,937 villages of the districts of the State. The demonstrations were largely attended by the Public.

147. *The Public Health Propaganda Section, Baroda.*—This section arranged 105 cinema shows and 49 magic lantern demonstrations in Baroda City and 83 villages of Baroda and Surat districts. Health exhibitions were organised at Asota, Baroda, Anndini Muwadi and Vasai villages.

148. *Propaganda through Welfare Societies and Sanitary Associations—Bombay Mothers and Children Welfare Society.*—The Society continued to carry on Health, Maternity and Child Welfare propaganda by means of Health Exhibitions, cinema shows and health talks in the Gujarat Division with full co-operation of the Ahmedabad Sanitary Association under the direction of Dr. C. M. Parikh, Hon. Divisional Secretary. Propaganda work was carried out both in mills and the city. Twenty-three mill exhibitions and cinema shows were organised for the benefit of the mill operatives and their families. Over 53,000 workers and their families attended the exhibitions and cinema demonstrations.

*Bombay Sanitary Association.*—The Health Visitor of the association carried out educational work by group talks. Ninety-six magic lantern lectures on prevention of infectious diseases and 96 lectures on typhoid to the students attending municipal schools and to the residents of private and municipal chawls were given. The Health Visitor participated in the celebration of the World Health Day. The Health Visitor visited 865 chawls in different slum areas with a view to finding out both sanitary and conservancy defects. The Association received grant-in-aid of Rs. 1,015 from Government.

*Broach Sanitary Association.*—The Association arranged 27 cinema shows in various parts of the city and at the J. D. Vakil Sanitary Museum Hall, Broach, and screened films on different health subjects. Health exhibitions were held at the time of annual fairs in Broach town. With the Co-operation of the Indian Red Cross Society Broach district branch, Child Welfare Work was carried out at the municipal Aminai dispensary and babies under 2 years of age were weighed and examined. Milk was also distributed free to poor and needy children. With the Co-operation of the St. John Ambulance Association, Broach Centre, 6 classes in First-aid to the injured were conducted. 119 candidates attended the classes out of which 72 candidates were successful and were issued senior First-Aid Certificates and the rest are due for examination on completion of the course. At the request of the Anti-Tuberculosis Association an Anti-T. B. and Health Exhibition was arranged with the help of models and posters of the J. D. Vakil Sanitary Museum Hall, Broach. Films on health subjects were also screened. World Health Day was celebrated on 7th April.

*Arogya Mandal, Poona.*—The members of the city inspection Committee of the Arogya Mandal visited different localities of Poona city and brought to the notice of the Medical Officer of Health, Poona Municipal

Corporation, the defects in connection with sanitation and complaints about insanitary conditions. The Child Welfare Centre of the Mandal is situated in thickly populated poor class locality.

The Health Visitor of the Centre attended children and pregnant women at the centre and gave advice in connection with matters of health. The Health Visitors also paid home visits and advised women about antenatal care. The Mandal gave milk to the poor and deserving children free of charge. Infants were given fruit juice and Kanji when required. Ultra-violet rays were given to children and infants when required as per doctor's advice. The total number treated during the year was 2021. Several exhibits are on view in the health museum maintained by the Mandal. The Mandal provided appliances, such as clinical thermometers, hot water bags, ice bags, bed pans, enema pots, breast pumps etc. to poor and needy sick persons. The members of the Mandal inspected sanitary arrangements made by the Alandi Municipality at the time of Kartiki Fair and made some suggestions which were carried out by the Municipality. The Mandal arranged an health exhibition at the time of the fair. A health-week was observed by the Mandal with the co-operation of the Poona Municipal Corporation. A health exhibition was also held at the time of observing the World Health Day on 7th April 1952. A grant of Rs. 200 was given to the Mandal by Government.

#### *Bombay State Council.*

*Hind Kusht Nivaran Sangh (Indian Leprosy Association).—*Leprosy Hospital at Sholapur and Acworth Leper Home, Matunga, received grants from the Sangh. The total attendance at these centres during the year 1952 was 1,19,486·4,655 old cases and 2,106 new cases were treated at these centres. The total amount of Rs. 13,580 was received during the year and amounts of Rs. 3,839-8-0 and Rs. 1,960 were spent as maintenance charges and office expenses, respectively.

*Sanitary Association, Ahmedabad.—*The Association observed W. H. O. week and held exhibitions, lectures and cinema shows. The Ahmedabad Municipal Corporation arranged the cleaner locality competition with help of the Association and the city was kept ideally clean. In all 28 poles, 11 chawls and 13 schools took part in the competition. The models, posters, cinema unit and the films of the Association were placed at the disposal of the Hon. Divisional Secretary for mill shows and the Association helped in arranging exhibitions, explaining exhibits and films and giving short talks at 20 mills. Cinema shows were arranged on the occasion of celebrating the Harijan day, Labour Welfare day and Education day organised by Ahmedabad Samaj Shikshan Samity. The Health Visitor of the Association made 400 complaints about insanitary conditions and the Municipal Corporation took notice of these complaints and tried its level best to remove the nuisances complained of. The staff of the Association explained to the visitors the exhibits kept in the sanitary museum.

## CHAPTER XIV

## PUBLIC HEALTH ADMINISTRATION.

149. *Public Health Administration.*—The Public Health Department consists of the following staff under the administrative control of the Director of Public Health :—

Three Regional Assistant Directors of Public Health are in charge of the three Registration Districts and 4 functional Assistant Directors in charge of Malaria, Plague, Public Health Laboratory, Poona and Vaccine Institute, Belgaum, respectively. A Chief Chemist is in charge of Public Health Laboratory at Baroda. Of the 24 sanctioned posts of District Health Officers, 3 were vacant. There were besides 4 Divisional Medical Officers of Public Health (two each in Kanara and Dharwar), one Entomologist, one Junior Entomologist, 10 Medical Officers in Malaria Organization, one Medical Officer in charge of Health Unit, Sirur, 1 Plague Control Officer, 3 Medical Officers in charge of Mobile Hospital Units and one Superintendent, Vaccine Institute, Belgaum.

The sub-ordinate staff consists of one lady doctor, 43 Epidemic Medical Officers (19 posts are vacant), 17 Assistant Medical Officers (12 of these posts are filled by Malaria Supervisors for want of medical persons), 10 Malaria Supervisors, 8 Malaria Assistants, 22 Malaria Inspectors, 10 Assistant Medical Officers of Mobile Hospital Units, 24 nurses, 10 compounders, 24 Health Visitors, 31 Midwives and 23 trained Dais, 1 Engineering Supervisor, 62 Insect Collectors and 154 Sanitary Inspectors, 98 Sanitary Sub-Inspectors, 511 vaccinators and 265 squads of health workers (consisting of 1 mukadam and 3 mazdoors). In addition, during the Malaria season temporary personnel was employed for spraying D.D.T.

Appendix II of this report shows particulars of the Health Services in Rural and Urban areas.

Appendix III will show the Maternity and Child Welfare Centres and Health Visitors etc. in rural and urban areas.

Appendix IV of this report shows the annual income and expenditure of the Institutions under the Public Health Department in the State during the year 1952-1953.

150. *Training of Public Health Personnel.*—There were 162 candidates in the roll of the Sanitary Inspectors' Class at Bombay which is conducted by the Bombay Municipal Corporation in co-operation with the Government of Bombay and the Royal Sanitary Institute, London. 21 candidates did not attend the course. 139 regulars and 23 repeaters, making a total of 162 candidates, enlisted their names for the examination. 159 candidates appeared for the examination and 77 were declared successful.

During the year under report, one session of the Sanitary Inspectors' Class in Marathi, conducted by the Government of Bombay, at Poona, was held from July to November 1952. In all 50 candidates were admitted to the class. 51 students including repeaters appeared for the examination and 35 were declared successful.

The Sanitary Inspectors' Class conducted in English by the Bombay Government has been discontinued. The last examination special arranged for the repeater students of the English Class was held in June 1952. In all 15 students appeared for this examination and 5 among them were declared successful.

40 Subsidised Medical Practitioners were given training in sanitary and public health work during the year under report.

## CHAPTER XV

### VACCINATION

151. *Selected Districts.*—The system introduced in 1910 by which the control of vaccination is exercised by certain District Local Boards was continued in Sholapur, Bijapur, West Khandesh and Surat Districts. These are called "Selected Districts". The control of vaccination in the area of Satara North and Dharwar District Local Boards, which was transferred to the respective Boards in 1933 and 1936, remained with the Boards. These are called "control transferred districts". The rest are "non-selected districts".

152. *Primary vaccination (Appendix VI Statement No. 1).*—12,61,649 primary vaccinations were carried out during 1952 against 12,02,464 in the previous year.

*Results.*—Out of 12,61,649 primary vaccinations performed, or 9,80,794 could be inspected, out of which 9,68,508 or 98·75 per cent were successful and 12,288 or 1·25 per cent were unsuccessful. Results could not be ascertained in 28·63 per cent of the total number of vaccinations.

*Age and Sex.*—Of the primary vaccinations, 6,53,804 were among males and 6,07,845 among females, giving a proportion of 107·56 to 100 among males or 81·10 per cent of the primary vaccinations inspected were among infants (under one year), 1,60,507 or 16·36 per cent between the ages of one and five and 11,373 or 1·16 per cent between the ages five and ten.

153. *Re-vaccinations (Appendix VI Statement No. 1).*—22,33,000 persons were revaccinated during the year under report against 22,19,000 during the previous year. Out of these, 5,37,991 could be inspected and 2,37,089 were found successful. The percentage of successful cases in which the results were known was 44·07.

154. *Vaccine Institute, Belgaum.*—During the year purity and potency of lymph were tested as usual. The total number of doses of vaccine lymph manufactured and despatched were 47,63,325 and 40,78,070 respectively as against 58,95,265 and 48,42,785 respectively during the previous year. A chart showing the results of insertions successful among primary vaccinations in the 3 Registration Districts and Bombay City is attached.

# CHART VII

INSERTION SUCCESS RATES OF PRIMARY VACCINATIONS  
WITH GLICERINATED LYMPH IN THE SEVERAL REGISTRATION  
DISTRICTS OF THE PROVINCE & BOMBAY CITY  
FOR THE YEARS 1950,1951 &1952.

During the year under report the experimental production of Vaccine lymph from sheep, undertaken during the previous year, was continued. The result of the experiments is yet to be assessed.

818 calves were vaccinated during the year under report. The average of pulp per calf vaccinated was 53·07 gms. and that per cow calf harvested for the preparation of vaccine lymph was 55·79 gms., the corresponding figures for the preceding year being 52·06 gms and 57·88 gms. respectively.

Seed lymph maintained by periodical passage through the rabbits was used for vaccination of cow calves with good results, both as regards the quantity of lymph and the yield.

24 Vaccinators from merged States were trained in the preparation and preservation of vaccine lymph for a period of one month in batches of 4 per month from 1st June 1952 to 31st December 1952.

155. *Compulsory Vaccination.*—Excluding Bombay City and six cantonments of Ahmedabad, Ahmednagar, Poona, Kirkee, Belgaum and Sevli, the Bombay District Vaccination Act, 1892, has been applied to 37 towns and 1,715 villages in the State. During the year, the Bombay District Vaccination Act was applied to 6 towns and 24 Villages.

156. *General Remarks.*—A training class for candidate vaccinators was held at the Vaccine Institute, Belgaum. There were 20 candidates, 1 of whom passed the final test. 8 Sanitary Sub-Inspectors and 2 Sanitary Inspectors from the Jamkhandi and Athani Municipalities were trained in the technique of manufacture and preservation of lymph.

## CHAPTER XVI

### OTHER PUBLIC HEALTH SERVICES

157. *Public Health Laboratory, Poona.*—The following table shows the number of samples of water examined in the Public Health Laboratory, Poona :—

Poona Cantt. water works.	Poona city water works.	Holkar's Bridge water works.	Pashan water works.	Kirkee water works.	Other sources.	Total.
2,181	138	1,144	1,214	1,144	2,129	7,950

The number of samples examined chemically were as follows :—

Water from Poona Cantt water works.	Water from other sources.	Sewage effluents.	Food drugs chemicals etc.	For fixation of dosage of sterilizer and determination of free chlorine.	Other Miscellaneous.	Total.
1,226	1,006	402	9,056	6,179	3,806	21,675

In addition to the examination of articles of food sent from municipalities which have adopted the Bombay Prevention of Adulteration Act, the following additional samples were received and examined in the Laboratory :—

(a) 222 articles of food received from the Assistant Controller, Grain Shops, Central Railways.

(b) 88 Samples of various articles of food from private persons.

(c) 151 Samples received from Government Institutions such as hospitals, Government rationing offices etc.

34 Samples of coal and 9 samples of sulphate of alumina received from Government water works were also examined at the laboratory.

*Public Health Laboratory, Baroda.*—9 water samples were received for analysis from Government Departments and one from the Jagadis Mills. In addition to the samples from Municipalities, 38 samples of milk, 292 samples of ghee, 13 samples of vegetable ghee, 1 sample of butter, 2 samples of castor oil, 1 sample of tea, 4 samples of Atta and 1 sample of Khurasni were received for analysis from the Department staff, Revenue Officers, Chief Medical Officer, Central Jail, Magistrate of Padra and certain private bodies.

*Municipal Laboratory at Ahmedabad.*—During the year under report Shri M. V. Sane was in charge of the Laboratory, 7931 samples of food, water and other miscellaneous articles were examined chemically, 70 samples of milk, water etc. were examined bacteriologically and 70 samples of blood, urine, sputum, stools, etc. were examined.

*The Municipal Laboratory, Surat.*—1180 samples of milk, ghee, edible oil, butter, vegetable product etc. were examined, out of which 103 were found adulterated. 24 samples of water were examined chemically, 72 bacteriologically and 44 samples of water for determining dosage of chlorine.

158. *Adulteration of Food Stuffs.*—The Bombay Prevention of Adulteration Act, 1925, was in force in the towns of Bombay, Ahmedabad, Surat, Broach, Dhulia, Sholapur, Ahmednagar, Amalner, Hubli, Kapadwanj, Thana, Nadiad, Pandharpur, Nasik, Belgaum, Ankleshwar, Godhra, Trimbak, Poona City, Bulsar, Barsi, Bhusawal, Dharwad, Malegaon, Igatpuri, Chopda, Statara City, Umreth, Chalisgaon, Mahabaleshwar, Viramgaon, Gadag-Betgeri, Anand, Poona Cantonment, Manmad, Bagalkot, Jalgaon, Nandurbar, Pauchgani, Rander, Miraj, Bijapur, Karad, Erandol, Sangli, Dakor, Raver, Kalyan, Amreli, Navsari, Baroda, Dabhoi, Kadi Karban, Padra, Patan, Mehsana, Radhanpur, Vadnagar, Vijapur, Kalol, Sidhpur, Ilkal, Vyara, Bilimora, Kathod, Guledgud, Kolhapur, Faizpur, Abu-Road, Ahmedabad Cantonment, Dohad, Jumbusar, Shirpur, Petlad, Dhinoj, Visnagar and Rajpiper. Its provisions are being extended to other towns.

The following table shows the number of samples examined by the Public Analyst concerned and the number found adulterated :—

159. *Industrial Hygiene including Hygiene of mines.*—The Assistant Directors of Public Health incharge Registration Districts and the District Health Officers continued their inspection of factories (under the Factories Act, 1948).

71 factories were inspected in the Northern Registration District during the year by the District Health Officers of Surat, Baroda, Amreli, Kaira, Broach and Panch Mahals Districts. 6 mines were inspected by the District Health Officers of Surat, Baroda and Panch Mahals Districts, as Ex-Officio Inspectors of mines. Information regarding hygienic condition of the labourers employed at the Shivrajpur mines in Panch-Mahals Districts at of the Free Land Ganj Railway Work Shop at Dohad is detailed below :—

Place.	No. of employees.	No. of cases treated.	No. of deaths due to						All others causes.
			Phthisis.	Diarrhoea.	Fever.	Acci- dent.	Small pox	Dysen- tery.	
Railway Work-shop Dohad.	16,612	38,731	...	...	1	2	1	1	42
Shivrajpur mines.	5,598	20,930	8	17	9	...	1	6	47

39 Factories were inspected in the Central Registration District by the District Health Officers of Nasik, Kolaba, Ahmednagar, Thana, Poona, East Khandesh, and West Khandesh Districts.

The District Health Officer, Thana, inspected 4 mines during the year under report.

43 factories were examined in the Southern Registration District by the District Health Officers in Satara North, Bijapur, Ratnagiri, Belgaum, Sholapur, and the Medical Officers of Health Haveri, Kanara East and Kanara West Divisions. The Assistant Director of Public Health, S. R. D., Belgaum, inspected the slate factory at Kaladgi, District Bijapur.

## CHAPTER XVII

### GENERAL REMARKS

160. *Research work, Malaria.*—The Research work done by the Malaria Organisation has been described in Chapter VI of this report.

*A New Disease.*—Investigations into the nature and different modes of treatment were carried out in respect of the new disease with symptoms of frequent urination and great thirst which appeared in parts of Ahmednagar and Poona Districts these have been described in Chapter IV of this report.

*Adulteration of ghee with hydrogenated vegetable oils.*—A scheme for finding out methods and technique to detect the adulteration of ghee with hydrogenated vegetable oils has been undertaken at the public Health Laboratory, Poona, since 15th March 1952.

161. *Scarcity.*—Scarcity was declared in Amreli, Sabarkantha, Banaskantha, Mehsana, Kaira, Baroda, Broach, Ahmedabad, Panch-Mahals, Surat, West Khandesh, Bijapur, Sholapur, Belgaum and Dharwar Districts. Steps were taken for protection of public health in the scarcity areas. The situation was under control from the health point of view. The existing Public Health staff carried out measures which were two-fold viz. rendering medical aid to the people engaged on the scarcity works and carrying out anti-epidemic measures on the works as well as in the villages in the scarcity zone. The measures carried out by the Public Health staff constituted general, sanitary and conservancy arrangement, regular disinfection of all water supplies, prophylactic inoculations against cholera and vaccination against small-pox.

*Immunization.*—1,26,099 inoculations against cholera and 6,605 primary vaccinations and 38,267 revaccinations against small-pox were performed by the staff in the scarcity affected areas.

*Supplementary Food, Vitamin tablets.*—2,25,500 vitamin and 19,202 multi-vitamin tablets and nutritious food-stuff such as condensed milk, milk powder, cream milk, pea soup, carrots, etc., were also distributed to the labourers on scarcity works and also in affected villages.

*Medical Aid.*—The Epidemic Medical Officers and 7 Special Medical Officers appointed on scarcity duty carried out medical aid. In addition the Subsidised Medical Practitioners and Dispensary Medical Officers of the neighbouring places paid weekly visits to the scarcity camps and rendered medical aid. The Medical Officers also visited the scarcity works to watch the nutritional state of labourers and to distribute vitamin, quinine and paludrine tablets.

*Distribution of anti-malaria drugs.*—9,737 quinine, 1,603 quinacrine 6,479 paludrine and 39,590 Mepacrine tablets were distributed free to the needy persons.

162. *Public Health Act.*—The question of enacting a comprehensive Public Health Act is under the consideration of Government. Government appointed a Committee in October 1952 consisting of Dr. M. D. D. Gilder as Chairman and the Director of Local Authorities, C. D., the Surgeon-General with the Government of Bombay, the Public Health Engineer to Government and the Director of Public Health as members. The Director of Public Health also acted as Secretary of the Committee and the Public Health Engineer was co-opted for drafting section on environmental Sanitation. The Committee has submitted to Government the revised draft Public Health Bill,

163. *Personal Proceedings.*—The post of the Director of Public Health was held by Shri E. Benjamin, D. P. H., up to 10th October 1952 and thereafter by Shri D. K. Viswanathan, L.M. & S., B.S.Sc., M.P.H., F.A.Sc.

The post of the Assistant Director of Public Health, C. R. D., Poona, was held by Shri N. T. Advani, D. P. H., throughout the year.

Shri C. M. Dighe, D. P. H., held charge of the post of the Asstt. Director of Public Health, S. R. D., Belgaum, throughout the year.

The post of the Assistant Director of Public Health, N. R. D., Ahmedabad, was held by Shri T. B. Patel, D. P. H., during the year 1952.

Shri D. K. Viswanathan held the post of the Assistant Director of Public Health I/C Malariology till 10th October 1952 and Shri T. Ramchandra Rao thereafter.

The post of the Asstt. Director of Public Health (Plague) was vacant and Shri S. T. Redda held additional charge.

Shri R. Sanjiva Rao held the post of the Asstt. Director of Public Health I/C Vaccine Institute, Belgaum.

The Asstt. Director of Public Health, N. R. D., Ahmedabad, visited 112 towns and villages during the year. He made a complete survey of 5 towns. Twelve villages were visited for the purpose of vaccination. He visited the areas affected with epidemics, especially small-pox and advised the Local Authorities regarding measures to be taken against the spread of the disease. He also visited the scarcity affected areas in his Division. He inspected the sanitary arrangements made at the Shukaltirth Fair in Broach District.

The Asstt. Director of Public Health, C. R. D., Poona, visited Palasdeo, Dehu, Talegaon, Dabhade, Alandi, Khed, Vadgaon, Manjri and other villages in Poona District for cholera investigation and other anti-cholera measures. He visited Panwel and Mulund for inquiry into the outbreak of cholera and Mahad and Kandivli for inquiry into the outbreak of small-pox. The Asstt. Director visited the Displaced Persons Colony at Pimpri in Poona District twice and the Displaced Persons Colonies at Chembur, Mulund and Kurla for inspection of sanitary conditions maintained in these colonies. He also visited the Mobile Hospital Units, C. R. D. and N. R. D. from time to time and inspected the work carried out by these units. He inspected the Combined Medical and Public Health Units at Khadakwasla in Poona District and Nanashi in Nasik District. He inspected the Sanitary arrangements made at the fairs held at Alandi, Dehu, Karla Caves, and Bhimashankar in Poona District, and also inspected the public health arrangements in Poona.

he Asstt. Director of Public Health, S. R. D., Belgaum, visited 304 villages during the year under report. Out of these, 25 were for cholera, 1 for small-pox, one for plague, 5 for guineaworm, 1 for leprosy, 14 for sanitary inspections, 70 for inspection of sites, 110 for vaccination operations, and the rest for other purposes such as scarcity, factory inspection etc. He also supervised the Sanitary arrangements at the Anjali fair in Belgaum District. He camped at Pandharpur at the time of the Ashadhi fair from 27th June to 6th July 1952, and supervised the sanitary arrangements made by the Municipality.

he Director of Public Health for the Government of Bombay attended the following meetings held in Bombay during the year :—

- (1) Board of Health.
- (2) Board of Physical Education.
- (3) State Council on Blindness.
- (4) Bombay Mothers and Children Welfare Society.
- (5) Bombay Nurses, Midwives and Health Visitors' Council.
- (6) State Council of Hind Kushta Nivaran Sangh.
- (7) Draft Public Health Bill.

He attended the quarterly meetings of the Yeravda Central Prison. He camped at Pandharpur from the 30th June to 2nd July 1952 and supervised the Sanitary arrangements made by the Municipality in connection with the Ashadhi fair. He also attended the annual meetings of the Advisory Committees of the Scientific Advisory Board at Pandharpur during the year. He paid visits to the scarcity affected areas in the State.

Moona 1, 6th July 1953.

D. K. VISWANATHAN,  
Director of Public Health for the  
Government of Bombay.
